

DRILL BITS

JOBBER'S LENGTH J&B MAGNUM PREMIUM 135° Split Point

- 135° split point for fast penetration and accurate starting without a center punch.
- **Holds tighter hole size.** The split point design is self centering. This limits the normal oversize drilling characteristics.
- The flatter point takes a smaller chip. More torque is directed to a smaller area. This allows drilling into materials with hardness of over 30 on the Rockwell "C" scale.
- Special **HI-MOLYBDENUM** drills are heat treated at 2185 F and then nitro-carburize finished at 950 F to be measurably **HARDER THAN HIGH-SPEED STEEL.**
- Recommended for use in work hardening grades of stainless steel and other hard metal drilling applications. **FLATS ON SHANK.**
- Body and clearance are gold surface treated for **MAXIMUM LUBRICITY.**

DRILL BITS

MECHANIC'S LENGTH MAGNUM PREMIUM 135° Split Point

- Special **HI-MOLYBDENUM** tool steel is heat treated at 2185°F and then nitro-carburize finished at 950°F to be measurably **HARDER THAN HIGH SPEED STEEL**.
- 135° split point for fast penetration and **ACCURATE STARTING** without center punch.
- Body and clearance are gold surface treated for **MAXIMUM LUBRICITY**.
- **FLATS ON SHANK** give positive chuck-grip and virtually eliminate drill/chuck slippage.
- Recommended for use in work hardening grades of stainless steel and other hard metal drill applications.
- **MECHANICS LENGTH:** The shorter overall length and reduced flute length results in a stronger more rigid drill with greater breakage resistance.

A MAGNUM DRILL WITH IT'S THIN WEB WILL PENETRATE THE WORK HARDENING STAINLESS FAST ENOUGH TO CONTINUALLY CUT BENEATH THE CHIP WHICH IS HARDENING FROM DEFORMATION. THIS MEANS THE DRILL IS CUTTING SOFTER STEEL.

THE COBALT DRILL, WITH IT'S THICKER WEB, CANNOT BE FED AT A FAST ENOUGH RATE TO CUT BENEATH THE AREA WHICH IS HARDENING. AS A RESULT THE COBALT DRILL IS CONTINUALLY DRILLING INTO HARDENED STEEL.

DRILL BITS

J&B HIGH SPEED COBALT Heavy Duty 135° Split Point, Gold Finish

- For use in drilling hard tough metals, free machining stainless steel, high temperature alloys, titanium and certain plastics.
- High red hardness of cobalt steel permits speeds **30%** higher than regular high speed steel drills.

THE HIGH CONTENT OF COBALT GIVES THE DRILL:

- HIGH ABRASION RESISTANCE
- HIGH PERFORMANCE ON STAINLESS STEEL
- HIGH RESISTANCE TO HIGH TEMPERATURES
- HIGH DRILLING CAPACITY TO HEAT-TREATED STEEL

CARBIDE MASONRY DRILLS

Slow Spiral - Heavy Duty

- Carbide tipped, hardened steel bodies.
- The fastest, easiest way to drill holes in brick, tile, cement, asbestos, marble, concrete.
- No special equipment needed. Use them in any regular electric drill.
- Ideal for expansion bolt installation, installation of plumbing, heating, or air conditioning equipment, anchoring partitions, setting tile and wiring buildings.

CUTTING TOOLS

RAPID REAMER

- Drill truck frames in **MINUTES INSTEAD OF HOURS**. Specially engineered incline plane makes the difference.
- Reduces time, drill breakage, extreme pressure required on large diameter drills.
- Reamers start with only small, easy to drill pilot hole - then go into action to quickly enlarge the hole to size.
- Use heavy-duty 1/2" or larger drill with at least 4.5 amps; best results obtained if motor is 6 to 15 amps. High amps provide constant torque with even speed. For best cutting results, apply a medium amount of feed pressure at a maximum of 200-400 RPM.

J&B #	SIZE	SHANK SIZE	OVERALL LENGTH
38629	3/8	3/8	5-7/8
38630	7/16	7/16	5-3/8
38632	1/2	1/2	5-7/8
38633	9/16	1/2	5-7/8
38634	5/8	1/2	6-1/2
38636	3/4	1/2	6-3/4
38638	1	1/2	7

USE RAPID REAMER FOR:

5th Wheel Mounting * Spring Hangers * Fuel Tank Mounting * Tool Box Mounting * Accessory Mounting * Enlarging Spring Center Bolt Holes * Tow Hook Mounting * Weighted Bumper Mounting on Cranes * Installing Teeth on Front Ends * Loader Buckets * Enlarging Misaligned Holes

TYPICAL APPLICATIONS

Bumper Hitch Installation Panel Hole Alignment Re-size Elongated Holes

CUTTING TOOLS

STEP DRILL

- 3 flatted shank
- Laser-marked for easy size identification.
- Made of industrial grade **high-speed** molybdenum steel.
- Drill up to 1/8" thick material.
- The single radial concave flute design means smooth, even cutting and truly round holes.
- **Self-starting** tip won't skid like standard twist drill bits.

J&B #	STEPS	RANGE	INCREMENTS	SHANK SIZE
41885	9	1/4" - 3/4"	1/16"	3/8
41883	10	1/4" - 1-3/8"	1/8"	1/2
41884	12	3/16" - 7/8"	1/16"	3/8

APPLICATIONS:

Ferrous & Non-Ferrous Sheet Metal * Wood * Plastic Laminates * Sink Grade Stainless Steel * Maintenance * Electrical Contracting * Plumbing * Auto Body Repair * Heating * Rust Proofing * Air Conditioning * Steel * Copper * Brass * Aluminum

DRILL BITS

LEFT HAND DRILLS

J&B Magnum Premium

- Special Hi-Molybdenum tool steel.
- 135° split point for fast penetration and **ACCURATE STARTING** without center punch.
- Precision ground point, flutes, body, clearance and drill diameter for the ultimate in accuracy and performance.
- Body and clearance are gold surface treated for maximum lubricity.
- Ideal for drilling broken studs.
- Left hand spiral drill will often loosen the bolt stud, thereby eliminating the need for use of a bolt extractor.

J&B #	DRILL DIAMETER	DECIMAL EQUIVAL.	OVERALL LENGTH
40890	1/16	.0625	1-7/8
40891	3/32	.0938	2-1/4

40901	7/16	.4375	5-12
40903	1/2	.5000	6

LEFT HAND DRILL BIT SET

- Contains 1 each of sizes 1/16, 3/32, 1/8, 3/16, 1/4, 5/16, 3/8, 7/16 & 1/2.

J&B #	QTY
40670	EA

EXTRACTORS

SCREW AND PIPE EXTRACTORS

Hi-Carbon Steel

- For removing broken screws, bolts and threaded parts.
- A hole is drilled in the broken part and the extractor inserted. Turned to the left the spiral flutes grip and remove the broken part without damaging the threads in the hole.

J&B #	EXTRAC NO	TO REMOVE DIAMETER SCREW	DIAMETER SMALL END IN	DIAMETER LARGE END IN	LENGTH OVERALL INCHES	SIZE DRILL TO USE

28136	6	5/8 to 7/8 & 3/8 pipe	3/8	19/32	3-3/4	13/32

BOLT REMOVER SET

- **FAST** and **EASY** stud removal.
- Left hand spiral drills often eliminate the need for bolt and screw extractors.
- Drill may loosen bolt stud with counter clockwise rotation.

CONTAINS:

- 4 Left hand Super Premium drill bits with 135° split point.
 Sizes 3/32, 1/8, 3/16, and 1/4
 4 screw and bolt extractors
 Sizes 1, 2, 3 and 4

J&B #	QTY
40760	EA

EXTRACTOR SET

J&B #	QTY
28140	EA

CONTAINS:

- 1 each #1 thru #5 extractor

EXTRACTORS

SCREW, STUD & PIPE EXTRACTORS

Forged Hi-Carbon

- The square shape of these extractors gives the tools the ability to remove broken bolts, screws and pipes with minimum deformation of the broken part.
- These forged extractors will not chew up or expand the object being removed.

J&B #	EXTRACTOR #	TO REMOVE DIAMETER OF SCREW	SIZE OF SCREW EXTRACTOR		DRILL SIZE	QTY
			SHANK	POINT		
28141	1	3/16 to 9/32	3/16	1/8	1/8	EA
28142	2	9/32 to 11/32	1/4	11/64	3/16	EA
28143	3	11/32 to 1/2	5/16	7/32	1/4	EA
28144	4	1/2 to 3/4	3/8	9/32	5/16	EA
28145	5	5/8 to 7/8	7/16	21/64	3/8	EA

How to use:

To remove the broken threaded part: Drill a hole in the end of the broken part (left hand spiral heavy duty drills are recommended for this drilling operation) , insert extractor and turn counter clockwise using a wrench on the exposed end of the extractor. The broken part should unscrew without damage to the threads.

HACKSAW BLADES

BI-FLEX BI-METAL Welded Edge - Shatter-proof

- The distinctive, high speed steel cutting edge is an electron beam welded to a separate alloy back for **EXTRA STRENGTH . . . EXTRA CUTTING POWER.**
- Bi-metal blade combines tougher teeth with flexibility for a safer, **SHATTER-PROOF BLADE.**
- Heat treated cutting edge for faster and easier cutting.
- Shatter-proof bi-metal blade exceeds the cutting life of ordinary steel blades.

HACKSAW FRAME

- Precision-cast aluminum and steel frame.
- Unique lever tensions the 12" J&B blade to 30,000 psi (about twice that of ordinary frames).
- Blade doesn't twist when you bear down, doesn't bind in tough materials or structurals.

J&B #	QTY
38975	EA

FEATURES FOR PROFESSIONAL TOOL USERS

Use as job saw
(set screw holds
blade in position).

Use as compass
saw with reciprocating
blade in position.

Store spare blades
inside back.

Mount blade at 45°
for flush cutting.

Permanently inserted
pins.

Lever turns tensioning
screw. Eight turns max.
Tighten blade up to
28,000 PSI.

Solid front end grip.

SAW BLADES

CIRCULAR SAW BLADE Carbide tipped

- Carbide tipped. 5/8" universal arbor.
- Precision honed & impact resistant.
- Ultra thin kerf results in less wood cut & extends life of blade.

J&B #	SIZE	TPI	QTY
42140	7-1/4"	24	EA

BAR CHAMP – OUTER REAMER

- 3 HSS Cutting Blades.
- Fits 1/8" – 3/4" stock.
- For use with threaded rod, round stock, bar, stock, rebar, bolts.
- Used on steel, stainless steel, copper, brass, wood, fiberglass, plastic.

J&B #	DRILLING	HEX	QTY
41409	1/8-3/4	1/4"	EA

SAW BLADES

JIG / SABRE SAW BLADES

- Durable, high performance bi-metal jig/sabre saw blades outlast all other types of carbon and high speed steel blades.
- **SHATTER-PROOF**; wood and metal cutting.

J&B #	TEETH	LENGTH	QTY	RECOMMENDED USES
39214	24	3-1/8"	10	1/16" Steel and under, Thin wall tubing, Formica

JIG / SABRE SAW BLADES

For Bayonet machines

J&B #	TEETH	LENGTH	QTY	RECOMMENDED USES
41888	24	1-3/4"	10	Thin sheet steel, thin wall tubing, suitable for scroll work.
41889	14	3"	10	1/16" - 1/8" Steel, conduit, plastic, tubing, etc.

SLIK-KOTE JIG SAW BLADE

For Bosch machines

- A special treatment & coating results in a hard, abrasion resistant surface that adds to the cutting life of the blade.

J&B #	TEETH	LENGTH	QTY	RECOMMENDED USES
41974	12	3"	100	Especially fiberglass & other abasive materials. Also, metals including stainless.

SAW BLADES

BI-METAL RECIPROCATING BLADES

Morse Brand - Universal 1/2" Shank

- Tough **SHATTER-PROOF** bi-metal reciprocating blades fit all popular machines.
- The teeth retain their hardness and stay sharper longer.

J&B #	TEETH	LENGTH	QTY	RECOMMENDED USES
42158	14	6"	5	For metals heavier than 1/8", bar stock, angles, etc. Also rubber, Masonite, fiberglass, etc.
39224	18	6"	5	Heavy guage sheet metal, Conduit pipe, Tubing, Thin fiberglass
42034	18	8"	5	
42039	18	12"	5	

BI-METAL RECIPROCATING BLADES

Hybrid Wood / Metal

J&B #	TEETH	LENGTH	QTY	RECOMMENDED USES
42030	14/10	8"	5	Heavy guage metals, Compostions, Masonite, Wood, etc.
42032	14/10	12"	5	

BI-METAL RECIPROCATING BLADES

Wood

J&B #	TEETH	LENGTH	QTY	RECOMMENDED USES
42036	6	6"	5	For wood and nail-embedded woods, all composition material. Also non-ferrous metals
42037	6	9"	5	General roughing-in work in wood and nail-embedded woods. Fast cutting.
42038	6	12"	5	

SAW BLADES

BI-METAL RECIPROCATING BLADES

Sterling Brand – Universal 1/2”

- Tough **SHATTER-PROOF** bi-metal reciprocating blades fit all popular machines.
- The teeth retain their hardness and stay sharper longer.

J&B #	T.P.I.	LENGTH	QTY	RECOMMENDED USES
41700	10	6”	5	For metal decking, roofing and nonferrous metals.
41701	10	8”	5	
41702	14/10	8”	5	Heavy guage metals, Compostions, Masonite, Wood, etc.
41703	14/10	12”	5

41705	14	8”	5	
41706	18	6”	5	For heavy gauge sheet metal, coduit, pipe, tubing, thin fiberglass, etc.
41707	18	8”	5	
41708	24	4”	5	For metals lighter than 18 gauge thin wall tubing, formed sheet, trim, etc.
41709	24	6”	5	

METAL SCROLL CUTTING BLADES

J&B #	T.P.I.	LENGTH	QTY	RECOMMENDED USES
42157	14	3-5/8”	10	For scroll cutting heavy gauge metal, fiberglass, Masonite.

SLIK-KOTE

J&B #	T.P.I.	LENGTH	QTY	RECOMMENDED USES
41978	6	6”	10	A special treatment & coating results in a hard abrasion resistant surface that adds to the cutting life of the blade. Especially recommended for fiberglass & other abrasive applications. Also effective on metals, including stainless steel.
Not Pictured				

SAW BLADES

BI-METAL RECIPROCATING BLADES

Morse Brand - Havoc

- Cuts all woods, nail embedded wood and metals.
- Tapered blade body best for pludge cutting.
- Bi-metal construction for long cutting life and heat and wear resistant.
- Straight tooth pitch for fast cutting.
- Reinforced, positive rake 6 TPI tooth design is high impact resistance & more aggressive cutting.
- Long life in the toughest applications.

J&B #	TEETH	LENGTH	QTY	RECOMMENDED USES
63003	6	6"	3	Wood, wood composites, metal, nail embedded wood, metal studs, wallboard, roofs, walls, plaster, lath, general demolition
63004	6	12"	3	

HOLE SAWS

BI-METAL - VARIED PITCH

- **"FOLLOW THROUGH" DESIGN** permits cutting through single pieces, successive partitions, or stacked material.
- **HIGH SPEED STEEL**; welded edge; shatter-proof.
- Cuts all machinable materials quickly and accurately.

ILLUSTRATION SHOWING 3 STYLES OF TAPS

TAPER:

8 to 10 threads chamfered for easy thread starting in tough materials.

PLUG:

3 to 5 threads chamfered-general use when tapping to bottom of hole is not critical. (This is the most widely used type of tap.)

BOTTOMING:

1-1/2 threads chamfered - use after threads have been started for tapping to bottom of hole.

TAPS

3 PIECE TAP SETS

- Each tap set contains one each of the **taper**, **plug** and **bottoming** style taps.
- In blind holes tapped by hand to the very bottom, all three taps (i.e. taper, plug and bottoming) should be used in the order named.

T-TYPE TAP WRENCH

- Sliding T-handle with spring tension to hold handle in place. Self-equalizing jaws.

J&B #	FITS STANDARD TAPS	FITS MACHINE SCREW TAPS
22500	1/16 to 1/4	#0 to 14
22501	7/32 to 1/2	#12 to 14

- Straight handle design provides greater leverage. Used with square shank tools.

J&B #	FITS STANDARD	FITS METRIC
32327	1/4 to 1"	6mm to 24mm

TAP & DRILL SET

- J&B introduces the 19 piece combination set of quicktwist drill bits and matching taps.
- This unique set offers both the **drill** and **matching tap**, so you will never have to guess again.
- Quicktwist drill bits have a 135° split point for fast, accurate drilling. Their surface is coated with an alkali-nitrite bath to reduce adhesion.
- Taps are ground from super high speed steel.

SET INCLUDES ONE EACH . . .

KEENSERTS

- Easy to install; **NO SPECIAL TOOLS NEEDED.**
- Provides permanent threads that refuse failure, even under excessive loading; won't strip, rotate or pull out.
- Exclusive locking feature provides a positive, **mechanical lock** against rotation.
- Carbon steel inserts.

1. DRILL OUT OLD THREADS, USING STANDARD DRILL

2. TAP NEW THREADS, USING STANDARD TAP.

3. SCREW IN INSERT UNTIL SLIGHTLY BELOW SURFACE.

4. DRIVE "KEES" DOWN WITH SEVERAL TAPS ON INSTALLATION TOOL.

5. INSTALLED INSERT.

Quick, easy to remove
if necessary
with standard tools . . .

1. USE STANDARD DRILL to remove insert material between KEES.

2. Deflect KEES inward and break off.

3. Remove insert with E-Z OUT type tool.

4. An identical insert can now be installed in the original hole.

THREAD REPAIR INSERTS

HELI-COIL PERMA-THREAD

- Made of stainless steel wire; rolled to a carefully controlled thread form.
- Inserts adjust to tapped hole with a strength **exceeding** the original threads.
- Used on aluminum, aluminum alloys, steel, and cast iron.
- **Repair kits** restore stripped, worn, damaged threads easily to a permanent stronger than original condition.

Heli-Coils

Repair kits

40099	18MM - 1.50	1/2"	6	40147	18MM - 1.50	1

Repair kits include:

- one pack of stainless steel inserts
- one high speed steel tap
- one installation tool

*** Part#'s 40095, 40096, 40097 & 40099 are Spark Plug Series and have a shorter reach. Repair kit part#'s 40101, 40102 and 40144 do not come with inserts.

INSTRUCTIONS:

1. Drill out damaged threads.

2. Tap new threads.

3. Install new Perma-Thread insert. (Prewinding tool shown is used for fine thread applications only.)

4. Remove tangs from insert. You now have a permanently repaired thread.

NUTSERTS

THINSHEET INSERTS

- Secures threads from one side of work in materials too thin to support them.
- Steel - Zinc Plated. **Exceeds** strength of matching bolt or screw.
- Heavier upper lip provides extra pressure relief on thin sheet metals and soft aluminum, brass, copper, and plastics.

(Before Crimping)

(After Crimping)

11803	M8-1.25	.040 - .200	.499	.720	.540	1/2"	10

HOW IT WORKS:

1. The Thin Sheet Nutsert, held securely by the tool, is placed into a prepared hole.
2. Upon the tool's actuation, the threaded portion is pulled until the fastener's wall collapses radially outward, clinching it tight against the sheet.
3. The tool is withdrawn, leaving the Thin Sheet Nutsert ready to receive a bolt or screw.

LARGE FLANGE THINSHEET INSERTS

- Provides captive threads in materials too thin to independently support threads, or where costly tapping operations are to be eliminated.
- Can be used as a rivet to join materials that will ultimately have a separate component attached.
- Aluminum Alloy, Plain Finish.

FILES

ALL FILES ARE AMERICAN PATTERN (ENGINEERING)

FLAT FILES

SHAPE: Tapered in width and thickness. Double cut on both sides and single cut on edges.

USE: Favored for use in factories, machine shops, and garages because of its ability to work on iron, steel, etc. . . . and quick removal of stock from plain surfaces.

J&B #	LENGTH	CUT	QTY
39810	8"	BAST	EA
39811	10"	BAST	EA
39812	12"	BAST	EA
39813	12"	SMOOTH	EA

HALF ROUND FILES

SHAPE: Round on one side and flat on the other. Both sides are double cut. The file tapers toward the point in both width and thickness.

USE: The half round side (front) makes this file ideal for getting into rounded holes, concave corners, crevices, etc. Also can be used on flat surfaces.

J&B #	LENGTH	CUT	QTY
39825	8"	BAST	EA
39826	10"	BAST	EA

MILL FILES

SHAPE: Tapers slightly in width. Sides and edges are single cut.

USE: This is the most commonly used file in the USA. It is suitable for workshops and sharpening mill or circular saws, hoes, axes, spades, shovels, etc. Also for draw filing and finishing metals.

J&B #	LENGTH	CUT	QTY
39835	8"	BAST	EA
39836	10"	BAST	EA
39837	12"	BAST	EA

FILES

ALL FILES ARE AMERICAN PATTERN (ENGINEERING)

ROUND FILES

SHAPE: Shape tapers slightly toward point.

USE: Designed for enlarging circular holes, mouldings, concave surfaces, and rounded grooves.

J&B #	LENGTH	SIZE	CUT	QTY
39817	8"	5/16	BAST	EA
39818	10"	3/8	BAST	EA

THREE SQUARE FILES

SHAPE: Triangular as the Taper files, but double cut with sharp corners slightly set and single cut edges. Angles are 60° and tapers toward the point.

USE: For cleaning out corners, filing angles, taps and cutters. Also used on flat surfaces.

J&B #	LENGTH	SIZE	CUT	QTY
39831	10"	3/4	BAST	EA
39832	12"	27/32	BAST	EA

HANDY FILES

SHAPE: One side double cut for fast stock removal and one side single cut for smoother finishing. One edge single cut and one edge safe (uncut).

USE: Has many purposes such as sharpening hoes, lawn mower blades, sharpening metals and smoothing plastics.

J&B #	LENGTH	CUT	QTY
39805	8"	BAST	EA

FILES

FILE HANDLES

- Tite grip screw on file handle, high quality birch, natural wax finish.
- Screw on handle makes its own thread on tang of file.

J&B #	DESCRIP	STYLE	QTY
39840	For 8"	WOOD	EA
39841	For 10"	WOOD	EA

FILE BRUSH AND CARD

- Proper cleaning helps to prolong the life of a file.
- Use the brush side for general cleaning and the card side for stubborn clogging.

J&B #	QTY
39849	EA

CUTTING TOOLS

BRAKE LATHE BITS

- Replaceable carbide inserts maintain sharp cutting tools for optimum performance.
- For brake drum and disc lathes.
- Triangle brake lathe bits for Ammco and other machines.
- **Each box** comes with 10 screws and 10 triangular bits.
