Virginia Youth Sports Programs: Are You Concussion Compliant?

If your youth sports program uses public school property, pay attention! Virginia's concussion law applies to you!

VA Code 22.1-271.5 (July 2014)
January 2015 VA BOE Guidelines.

Virginia Concussion Law Requirement

FFPC3's Youth Sports Pre-Season Concussion Compliance Program

Before attending practices/games with your program, each player and at least one parent/guardian must **annually acknowledge** review and receipt of **concussion information**.

Online Concussion Education for Every Player and Parent

- Youth Program sets up account with FFPC3 24 hour turnaround! Quick and Easy Setup!
- Players and parents go online to access concussion education module and completion is tracked online.
- Eases burden on program administrators.
- Better than collecting signatures on forms that may not be read.

Only \$5/player and FREE for players getting baselined

Many parents whose kids participate in athletics will be asked to sign a waiver about concussion education, but that's not enough to ensure parents are confident about handling the injury, according to a 2014 University of Michigan C.S. Mott Children's Hospital National Poll on Children's Health. (emphasis added). See FFPC3.com for link to full article.

Players suspected of sustaining a concussion in a practice or game must be **removed from play**.

Online Concussion Training for Coaches

- Best practices in remove-from-play and return-to-play protocols, under VABOE Guidelines.
- Includes review of likely game scenarios.
- Online, paperless, convenient, verified.

Only \$3 per coach!

Coaches receive annual concussion training under VABOE Guidelines.

"Program was well done... Clear, articulate, easy to follow narrative supported by grounded facts in a very easy to follow format. Overall rating: Excellent! -- SYC Coach

Players removed from play **may not return to play** on the same day of injury, nor until evaluated by a licensed health care provider and in receipt of **written medical clearance**.

Pre-Season IMPACT Baseline Testing for your Program's Players

- Universally recognized by medical professionals as an important tool in concussion management.
- Measures brain functions like processing speed, reaction time, memory BEFORE injury, which can be compared to the athlete's IMPACT test AFTER injury.

Only \$25-35 per player

FFPC3's Youth Sports Concussion Expertise

We are **specialists** in the field of youth sports concussion, with **60 years combined experience**, working with **thousands of youth athletes** in all areas of concussion: research, education, detection, evaluation, concussion management for safe return-to-play and return-to-learn.

WE KNOW that the **FIRST** steps taken after injury by **INFORMED** coaches, parents and players are crucial to improving a child's recovery time from concussion.

WE CREATED THE SOLUTION for youth sports programs to quickly come into compliance with concussion laws in a way that truly informs your membership. Our online concussion education service conveys relevant, practical information, with verified receipt by your program's players, parents and coaches.
