Creeping Red Fescue:

New Lawn: 4 to 5 lbs per 1,000 sq. ft.

Overseeding: 2 to 2 $\frac{1}{2}$ lbs per 1,000 sq. ft.

Lawn Tips:

- Before you decide to plant grass seed, you should "work up the ground" to a depth of 3-6"
- Grass seed does not need to be planted more than $\frac{1}{4}$ of inch into the soil, you do not want to bury grass seed which makes it difficult for the seed to germinate
 - Rake to cover seeds with topsoil
- The most important step to remember is to keep your newly planted lawn moist-
DO NOT allow the grass seed to dry out! This needs to be done until the grass seed is well established
 - Always have a sharp mower blade
- Raise the blade to 2 $\frac{1}{2}$ to 3 inches for mowing in the heat of the summer
- Longer grass goes deeper into the photosynthesis process, which encourages deeper root growth
 - Remember that a regular lawn fertilizing program will promote a healthy lawn
