

Hello! I am Dr. Fisk and I recently opened the doors to *Busy Bee Chiropractic & Wellness* here in Newark on June 1, 2022.

I graduated from Northeast College of Health Sciences, formerly known as the New York Chiropractic College in Seneca Falls, New York. Being from the surrounding area I wanted to keep my office close to home so that I could offer competent care to an area that I love.

I offer chiropractic care using gentle and effective adjusting techniques as well as various modalities. Different modalities I offer include heat, e-stim, therapeutic ultrasound, dry cupping and more! I enjoy working with those of any age and all walks of life. I have treated patients as young as 1 week old to patients as old as 92 years old. A body in motion stays in motion and I like to make sure that my patients can live a life to its optimal potential.

When I opened the business I made the decision to not take insurance. Each state is different in what insurance will reimburse for and New York does not take into account the time and effort I like to put into each patient encounter I have. Each treatment is individualized to each patient and their needs. Due to this, I offer a chiropractic experience you have not had before. I look forward to helping you to feel your best!
