COURSE CONTENT

This course is built for the fire investigator to enhance the ability to detect and determine the origin and cause of a fire. Topics will include fire behavior, building construction, ignition sources, reading fire patterns, RV and marine fires. This course will also include the causes of electrical fires, wildland fires, vehicle fires and other natural and incendiary causes to structure fires. We will review case studies and students will conduct a fire investigation on an actual case.

Course registration can be completed online at
