Mission Statement

Nu-Di Corporation is a leader in service use test equipment for the transportation industry. Our mission is to achieve the highest standard of quality in ourselves and in all aspects of our business in order to exceed our customer's expectations.

Nu-Di Corporation is driven by the innovation, imagination and strength of its people. We strive to continuously improve ourselves, our company and our customer's position in their marketplace.

Our customers are rewarded with a high quality product delivered on time at a fair price. We exceed customer expectation through improving processes, innovative solutions and hard work.

We learn from every experience and rise to the heights of success as a team of people built around honesty, trust, and respect for each other, our suppliers and our customers. We endeavor to be leaders in all our markets and a source of pride in our community.

Our wire machine has the capability to cut and crimp 4,000 pieces of wire per hour.

Our capabilities and services include:

Engineering:

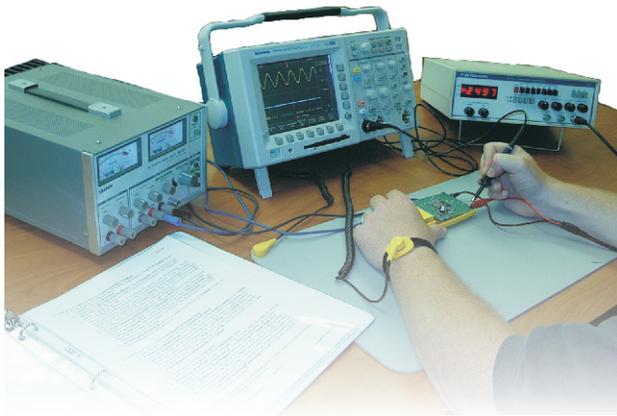

- custom electronic product development
- custom connector/boot design
- cable, adapter and transducer design
- breakout box and harness design
- embedded HW/SW design / consulting
- printed circuit board layout
- PC-based SW design
- diagnostic hand held niche tester design
- vehicle communication HW/SW design
- electronic product packaging

Manufacturing:

- through hole/surface mount PCB assembly
- in-house prototyping
- injection molding/overmolding
- comprehensive testing
- custom cable assembly
- pad print capability

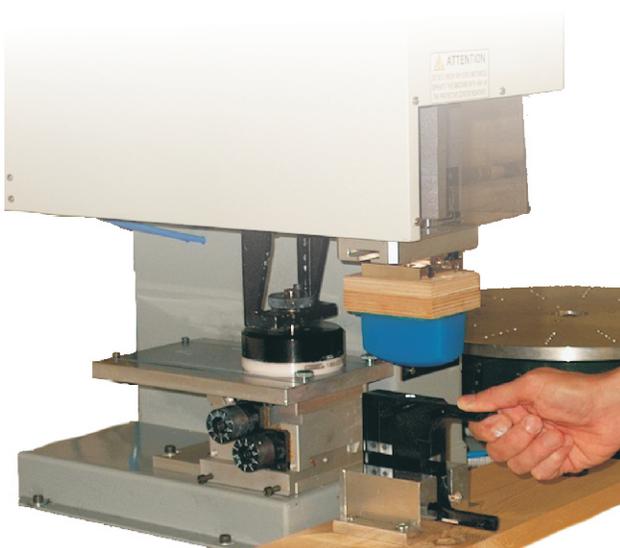

Our 80 ton vertical injection molding machine gives us the ability to manufacture custom boots, connectors, overmolds and strain reliefs. It has the capability of injecting various types of plastic and rubber.

Our products achieve a high quality standard through testing, ongoing process improvements and continuous personnel training.

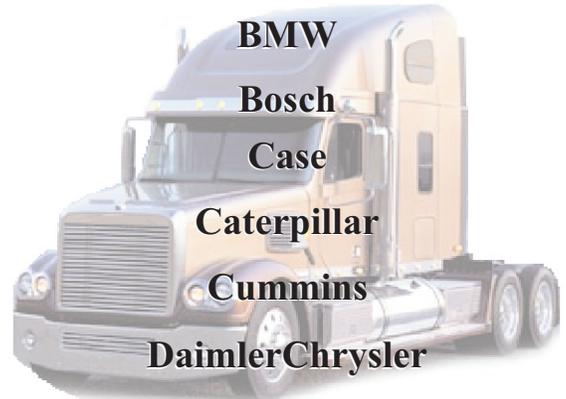

Nu-Di is an OEM supplier of automotive, motorcycle, watercraft, heavy industrial machinery, agricultural and off-road diagnostic equipment. Since 1976 our engineering and manufacturing capabilities have developed into what now enables us to provide our customers innovative quality products that are priced competitively and delivered on time.

Our products consist of cables, adapters, transducers, harnesses, breakout boxes and diagnostic testers. These and similar products range from fast-turn prototypes to volumes in excess of 10,000 units.

Our pad print machine has the capability of 1,200 cycles per hour. It can also print on a variety of materials such as glass, metal, plastic and rubber.

Our products are used by:

**BMW
Bosch
Case
Caterpillar
Cummins
DaimlerChrysler**

Detroit Diesel

Ford

GM

Harley Davidson

Honda

Hyundai

International

John Deere

Kia

New Holland

Polaris

Saturn

Snap-on

Volvo

VW/Audi

Nu-Di has the experience, dedication, personnel and capabilities to provide innovative engineering and manufacturing solutions to our customers. Our quality program, compliant with ISO 9000 standards, ensures continuous improvements in all aspects of our company. Our success and future rely on our performance and invaluable customer relationships.
