

Athena LeBon
Owner/Founder
Rockstar Spray Tans Spa
Sun Zero Solutions Tan Like a Rockstar
Master Spray Tan Artist

Hello, I'm Athena LeBon, the Founder of Rockstar Spray Tans Spa in Littleton and Sun Zero Solutions Tan Like a Rockstar. My journey into the spray tanning business and developing my own line of sunless solutions has been a dream come true. Over the past 13 years, I've had the privilege of spray tanning thousands of clients, including brides whom I previously tanned for their proms. I feel incredibly grateful to have a job I love and am truly passionate about.

Before Rockstar Spray Tans, I spent 12 years in the Information Technology industry as a self-proclaimed computer geek. In 2007, I became a stay-at-home mom and now have two wonderful boys. Prior to discovering spray tanning, I used to be a devoted sun worshiper, slathering myself in baby oil and neglecting sunscreen. I even resorted to tanning beds to achieve a base tan. However, in 2009, everything changed when I decided to try a spray tan before a vacation.

To my surprise, the results were incredible. I didn't turn orange, there was no damage to my skin, and I didn't smell like chemical products. I was amazed by the natural-looking tan I obtained. That experience sparked a desire to have a year-round tan, leading me to purchase my own equipment and solution. Initially, my attempts at tanning others were disastrous, and it became clear that I needed professional training.

Once certified, I realized I had stumbled upon a hidden secret about the health and beauty of our skin. As a spray tan artist, I was eager to share this knowledge with the world. I wanted to encourage others to protect their skin by avoiding prolonged sun

exposure, which can lead to age spots, wrinkles, and skin cancer. I was fueled by a strong passion to spread the word that spray tanning is safe, smart, and healthy.

I started spray tanning friends, family, and referrals from my home, and before long, my business flourished. I soon found a separate office space and had the fortune of meeting Margaret Kemble, the Owner of Bare Necessities Laser Clinic. Margaret and I formed a fast friendship and business partnership, culminating in the creation of Rockstar Spray Tans in 2010.

I am dedicated to raising awareness about protecting our skin from harmful UV rays while still achieving a beautiful tan that makes us feel radiant. My mission is to educate all generations, especially our youth, about the ability to achieve a gorgeous bronze tan without accelerating wrinkles, sunspots, or damaging our skin. This message has the power to save and change lives.

I am incredibly grateful for our amazing team in Littleton and feel blessed to share my business with them. Together, we continue to promote healthy tanning alternatives and empower individuals to feel confident and on top of the world.
