✓ Forwarding Labels

✓ Custom Statuses

✓ More Search Functionality

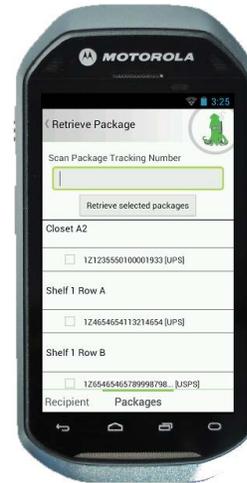

✓ More Reporting Power

✓ Customized Shipping Requests

✓ Faculty & Staff Portal

✓ Single Sign On

Simpler Than Kiosk

Advanced Routing

Common Challenges

Our delivery drivers seem to take longer than they should on their routes. Is there a way of seeing where they were and how punctual their deliveries and pickups are?

SqBx can plot the location of the handheld against Google Maps in real time to give you the visibility that you require. By barcoding the mail stops and having the driver scan the top along his/her route you can report against any tardiness.

We are getting a backlog of packages in our mail center because the students do not come down and pick up their items in a timely manner. Is there anything to help eliminate the problem?

SqBx can automatically send 1st, 2nd, 3rd, final or any other message desired by your campus via text or email to prompt timely package pick up. Messages can be time delayed to your specifications.

We are experiencing high call volume from faculty, staff and even students looking to track their packages. This causes our mail room to shut down. How can SqBx help?

SqBx provides an internal web portal where faculty, staff and students can log into and view the status of their own packages.

We would like to use our mobile devices when delivering packages but some of our employees use Android and others use iPhones. Is this a problem?

Absolutely not! SqBx offers options for all your mobility needs. From rugged commercial Android devices to BYOD of iOS and consumer Android devices, we have you covered. You can mix and match for your optimal solution.

Bring Even More Power With Modules

PO Integration

Receive packages, reconcile PO line items, and deliver with one application.

Single Sign On

Use the same login for SqBx as your campus credentials. Member of InCommon.

Faculty & Staff Portal

Permit everyone on campus visibility over their own packages.

Interoffice

Track time sensitive documents and materials between offices and campuses.

Outbound Shipping

SqBx offers a variety of outbound shipping options.

Locker Integrations

Locker deliveries are no problem with SqBx.

Asset Tracking

Assign and track fixed assets on campus.

Ship Requests

Faculty and staff can create electronic ship requests eliminating paper forms.

Fully Integrated Desktop Shipping

Create carrier labels, rate shop your contracted carrier rates and have visibility over shipping spend.

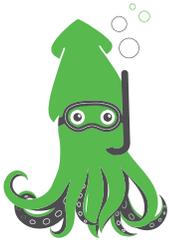

Print Job Tracking

Send automatic notifications for every stage in your print job process.

Faculty Staff Deliveries

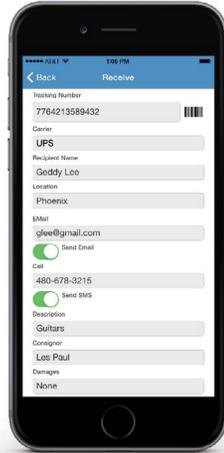

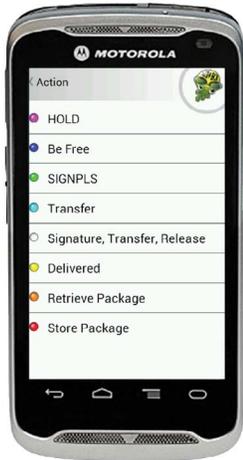

Powerful route management simplifies your faculty/staff delivery processes.
