Chair: Andrea Hebert

Recorder: Andrea Hebert

Call to order	Andrea Hebert
Welcome to new members	Rachel Milkey
Data Review	<p>Reviewed Mortality Data from WISH-lots of great discussions about region 2 data regarding firearms vs MVC rates and how they have changed</p> <p>Reviewed our regional data as well compared to state, overall steady, great decline in mortality for ages 0-14, is this related to all the peds readiness work? Kudos for much improved rates t/o region. Biggest OFI may be related to calling for transfer &lt; 90 mins on age group 65-75, to ensure they are getting transferred out w/in 3 hours when they have ISS &gt;15</p>
UT/OT	Reviewed state guidelines with goals for UT/OT. Reviewed what UT and OT mean, how to review and calculate rates, how to trend, and ideas for what to do with the data
Closing	Please email us with any further ideas of things we want to talk about or educational reviews you would like to see at upcoming RTAC PI meetings.
