

LEARNING LIKE YOU'VE NEVER SEEN BEFORE.

What sets **BBC Worldwide Learning** apart? It's digital video that inspires. Immersive, insightful and relevant to education, it's a means to teach, engage, and accelerate learning.

Powerful content that only **BBC Worldwide Learning** can offer.

Our renowned BBC factual archive offers 75 years—over a million hours—of engaging, accurate original programming. Add to that award-winning stories from BBC World News and CBS News; the Attenborough natural history collection; course content from The Open University; and cutting-edge HD science videos from Japan's NHK, and it's an educator's ideal.

An unparalleled resource, relevant for every grade and curriculum.

Historical or current. Nature or culture. Art or science. Whatever your curriculum, we have hundreds of videos to bring it to life. All of them rights-cleared, ready-to-licence, and easily searchable—by grade, subject, or special collections.

Customised content and workflow, when and how you need it.

Our learning library is built around you, letting you access videos in private screening rooms so you can comment, share or approve with a click. And we can help you create anything you don't find, with affordable customised video production services.

Decades of expertise in education, not just programming.

We put real resources behind our focus on learning: refining content with global education experts, and delivering on the most current digital platforms. That's how we offer the most memorable content, delivered in the way your students learn best.
