

Monitoring Violations Annual Notice Template

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Mill Creek Water Reclamation District

Our water system violated several drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the monitoring period 10/1/2024 – 12/31/2024 we tested for Gross Alpha Particle Activity. Samples were collected during the required monitoring period, however the laboratory failed to submit the results to the IEPA in a timely manner. Therefore, due to this laboratory error, we cannot be sure of the quality of your drinking water during that time.

During 2023 we tested for unregulated contaminants. However, these contaminants were not listed on the CCR that was sent on June 5, 2024. A revised 2023 CCR link was issued to all of our customers on November 7, 2024.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for these contaminants, how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
Lithium	1	1	April 2023	4/12/2023
Gross Alpha Particle	Quarterly	1	10/1/2024– 12/31/2024	10/21/2024

What happened? What is being done?

A revised 2023 CCR link was issued to our customers on November 7, 2024, for the Unregulated Contaminants which including the sample results for lithium.

Our Laboratory has been informed to upload all results to the Illinois EPA portal in a timely manner.

For more information, please contact the Mill Creek Water Reclamation District P.O. Box 229, Geneva, IL 60134 at 630-208-9898.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
