**GTR Letter of Reference:**

To whom it may concern,

My firm has designed and implemented more than 40 FIFA artificial turf fields in Canada.

GTR have installed several fields for our projects over the years. Of note they installed the first TPE Shock pad systems in North America for me at Richmond Hill in 2011 (2 fields).

TPE shock pad fields are the current 4<sup>th</sup> generation state of the art fields using shock pads and Thermo plastic infill instead of previous generation recycled rubber.

All the projects GTR have completed for us have been FIFA 1 or 2 Star.

In addition to the fields listed above GTR also completed two FIFA 2 Star fields for a sports complex we designed in North Bay. One field for football, and one field for soccer.

I would not hesitate to recommend GTR based on their track record installing artificial turf fields; the experience of their installation crews, and the companies attention to client and owner needs.
