

## Become a Partner with SkillsUSA Kansas

SkillsUSA Kansas partners are supporters of career and technical education. Our partners have an opportunity for input into skill training, a chance to recruit top technical students and the opportunity to help develop America's future workforce.

SkillsUSA Kansas serves more than 3,600 career and technical students and teachers Statewide. These students are training in our State's high schools and college/postsecondary institutions in a variety of careers such as cosmetology, automotive technology, machining, drafting, culinary arts and computer networking and much more.

More than 1,200 companies and organizations participate in SkillsUSA programs. Companies benefit by having input into specific skill training, an opportunity to recruiting top technical students, and the good feeling that comes from helping America's future workforce develop marketable skills. Many industries today face a shortage of skilled workers, and SkillsUSA offers a tangible way to help solve this problem by ensuring that there will be a future workforce trained in the skills industry needs.

To learn more about how your company can become involved, please contact the State Director. The director will share ways we can build a partnership to promote America's emerging skilled workforce.
