

Playing Long & Short Sounds

Click your tongue for the dots and say “sh” for the lines in the patterns below.

Choose a pattern and let someone in your family guess which one you’re performing.

Use crayons to create your own dot and line patterns for you and your family to play.

Instruments make long and short sounds too! You don't need to have a triangle or a woodblock to make music. Find something in your house to make short sounds and long sounds to play these same patterns.
