

The Serenity VPL-SH1 has been specifically designed for the authorized Dealer offering state of the art lift technology through the Installer to the person in need of the product. The VPL-SH1 was engineered to be light in manufacture compared to other products in the field, easily transported by minivan. Endurance and durability is of prime importance. The VPL-SH1 will stand the test of time for many years, maintaining a high level of longevity through the cold winters and heat factors of the summer months. This is a visually pleasing unit comprised of coated steel, stainless steel, aluminum, powder coating and plexi-glass. The inner circuitry, both A/C and D/C power combined with heavy duty electronic relay and tooth belt pulley system provide for smooth and secure motion for the person utilizing the VPL-SH1 lift. The VPL-SH1 has standard built-in electronics to enable a safety gate, GAL Lock, Call Send and Remote. This product meets or surpasses CSA, B613-00, ASME A18.1 and ADA requirements and is fully certified by a qualified mechanical and electrical engineer.

VPL-SH1 AC Serenity Vertical Platform Lift AC Power

Features:

- Lightweight vertical lift
- Unit weight under 350lbs
- Maximum lifting height of 52 inches (1320 mm)
- Platform Size: 54 x 34 inches (1370 mm x 863 mm)
- Power: 110V AC, 15A
- Quality parts and labour: Stainless steel and flexi glass construction
 - ✓ Weather protected
 - ✓ Maintenance free
- Front/Backyard or garage placement
- Indoor/Outdoor residential use
- Simple installation: Can be installed by single person
- Easy countrywide shipping: has been in the market for 2 years without problems
- All safety guidelines and regulations meet CAN/CSA B613-00
- Made in Canada

Specifications:

- AC 115 VAC @ 60 Hz
- .75 kW / 1 HP AC (reversible) single phase/capacitor – start motor
- Drive system single worm gear with tooth belt drive
- Safety features emergency stop button and audible alarm under pan sensors
- Rated load 750 lbs (341 kg)
- Travel
 - ✓ Lowest Point: 2.75 inches (70 mm)
 - ✓ Highest Point: 52 inches (1320 mm)
- Speed 1.5 inches/sec (7.5 feet/min)
- Platform Size
 - ✓ Width: 34 inches (864 mm)
 - ✓ Length: 54 inches (1370 mm)
- In compliance with the following regulations/standards
 - ✓ ASME A18.1 safety standard for platform lifts and stairway chairlifts
 - ✓ CSA –B355-00 lift for persons with physical disabilities
 - ✓ ADDG (Americans with disabilities act accessibility guidelines) where applicable
 - ✓ Meets and exceeds CSA-B613 guidelines

Accessories Available:

- Remote Control
- Landing Gate includes: GAL -Lock
- Call Send
- Landing Gate Sensor

VPL-SHI DC Serenity Vertical Platform Lift DC Power

Features:

- Lightweight vertical lift
- Unit weight under 350 lbs
- Lifting capacity of 750 lbs
- Maximum lifting height of 52 inches (1320 mm)
- Platform Size: 54 x 34 inches (1220 x 863 mm)
- Power Options: DC 24V
- Standard C/W 4A charge
- Quality parts and labour: stainless steel and flexi glass construction
 - ✓ Weather protected
 - ✓ Maintenance free
- Front/Backyard or garage placement
- Indoor/Outdoor residential use
- Simple installation: Can be installed by single person
- Easy countrywide shipping: has been in the market for 2 years without problems
- All safety guidelines and regulations meet CAN/CSA B613-00
- Made in Canada

Specifications:

- DC 24V
- 600 W ¾ HP DC (reversible) motor(600w-900w)
- Drive system single worm gear with tooth belt drive
- Safety features emergency stop button and under pan sensors
- Rated load 750 lbs (340 kg)
- Travel
 - ✓ Lowest Point: 2.75 inches (70 mm)
 - ✓ Highest Point: 52 inches (1320 mm)
- Speed 1.2 inches/sec (6.8 feet/min)
- Platform Size
 - ✓ Width: 34 inches (864 mm)
 - ✓ Length: 54 inches (1200 mm)
- In compliance with the following regulations/standards
 - ✓ ASME A18.1 safety standard for platform lifts and stairway chairlifts
 - ✓ CSA –B355-00 lift for persons with physical disabilities
 - ✓ ADDG (Americans with disabilities act accessibility guidelines) where applicable
