

# Intention & Vision

It is our intention to create a sacred and calm space that inspires others to live life with ZEN qualities~ bringing playfulness, strength, abundance, connection, better health, positive thoughts and expression into the fore front of their experience.

We offer this space for community to participate in, to give to and receive from, enhancing the quality and value of each others lives.

We envision a full and diverse community coming together to energize the body, awaken the spirit, transform the heart, and feed the soul. Together, we inspire greatness in each other and ultimately in the universal consciousness.

This vision for **PUR:ZEN** has been peculating for a few years now....

We began to aspire to live life fully, playfully, and vibrantly, and of course with a little attitude!

Now ,in our new location, we have created this space to inspire others and to collectively inspire each other to align with something higher, believing in a positive healthy relationship with ourselves and our higher self !

~ “acceptance” the Zen of LIFE!
