STANDARD CABINET SPECIFICATIONS

KCMA Certified

All cabinetry manufactured by Timberlake is certified by the Kitchen Cabinet Manufacturers Association (KCMA).

KCMA sets the American National Standards Institute/ KCMA 161.1- 2000 uniform performance and construction standards for kitchen and vanity cabinets. The program is referenced by U.S. government agencies, architects, builders, remodelers, and other specifiers.

Cabinets that bear the KCMA seal of certification are recognized as a quality product with the ability to perform after a rigorous battery of tests, simulating years of typical household use. Tests are performed by approved third-party independent laboratories.

Timberlake is proud to display the KCMA seal of certification for cabinet construction.

Environmentally Responsible Stewardship

As a leading U.S. manufacturer of fine cabinetry, Timberlake, a division of American Woodmark Corporation, is committed to conducting business in a manner that both protects the environment and safeguards public health and safety. To achieve this end, the company proactively identifies potential environmental risks and monitors compliance with appropriate federal, state, local, and internal standards.

Timberlake has received certification by the Kitchen Cabinet Manufacturers Association (KCMA) Environmental Stewardship Program on all products. The certification was awarded based on compliance across a broad range of activity including air quality, product resource management, process resource management, environmental stewardship, and community relations.

Timberlake works with all suppliers to encourage sustainable forestry practices. Particle board and plywood are purchased from suppliers that meet the Composite Panel Association requirements for Environmentally Preferable Products including formaldehyde emissions that comply with ANSI standards.

Timberlake uses leading edge technologies to limit both hazardous and non-hazardous emissions, byproducts, and waste. Ongoing, formal programs identify opportunities for recycling and reusing materials. When waste ultimately requires disposal, steps are taken to minimize the environmental impact.

The American Woodmark Foundation supports local programs serving the community, including activities focused on maintaining the quality of life.

Timberlake is dedicated to doing our part in the preservation and sustainability of the environment.

Finishing Systems and Cabinet Care

Finishing Systems

The finishing systems used on our products are designed to ensure the beauty and durability of our cabinetry. State-of-the-art equipment allows precise sanding, filling, and finish coverage of each of our products.

BeautyGuard® Finishing System

BeautyGuard is an extremely sophisticated and environmentally responsible coating that offers durability, ease of cleaning, and water resistance.

We use a combination of mechanical systems to bring out the richness, luster, and natural grain definition of the wood, as well as computerized automation to ensure color consistency and surface smoothness. Our BeautyGuard finishing system is a rigorous multi-step process that includes sanding, brushing, cleaning, stain application, computerized oven drying, and a catalyzed topcoat to protect and beautify cabinets for years to come.

TuffTech® Finishing System

Our TuffTech finishing system uses only 100% solids. This multi-step panel finishing system begins with three sanding operations followed by a top and bottom brush cleaning to provide a smooth surface for material adhesion. Next, an ultraviolet (UV) filler is cured using light ovens to seal the board completely. Once again the board is sanded and a waterborne adhesion material is applied and dried to provide an interlocking bond with the water-based paints. Depending on the product, two or three coats of paint are applied, dried and then covered with a UV topcoat. This topcoat is made of acrylics and urethane and acts as a sealant to protect the paint.

Environmentally Responsible Finishing

Our panel finishing system uses only water-based paints and fillers, yielding neither hazardous waste nor water contamination. Our acrylic and urethane materials are 100% solids, dried using high intensity lights, yielding no atmospheric emissions. Our products are extremely resistant to stains and surface damage that can be caused by common household chemicals. Our products exceed KCMA and ANSI standards for resistance to stains like coffee, grape juice, and moisture.

Cabinet Care

Remove dust from cabinets frequently with a soft lint-free cloth. The cloth may be slightly dampened with water or a spray type dust remover. Do not use a paste wax type material. Wax build-up is difficult to remove and will leave a residue that attracts dust and moisture. Polishes containing silicon should not be used. Clean spills immediately. Use a clean cloth and mild soap if necessary. Wipe dry with a clean soft cloth. Do not use detergents, citrus or ammonia based cleaners, steel wool, soap pads, or abrasive cleaners on cabinets.

Extra care should be taken that cabinet finishes are not exposed to heat in excess of 200° Fahrenheit (174° for thermofoil laminated door styles). Do not place or mount small appliances beneath wall cabinets. These appliances (such as coffee makers and toasters) can produce excessive heat, which can damage the finish of cabinets. Do not expose doors or drawer fronts (especially thermofoil) to heat created from self-cleaning ovens or ranges. A heat shield kit should be used when thermofoil cabinets are installed or mounted directly next to an oven or range.

For more cabinet care information, please visit www.timberlake.com/care.

Allow Cabinets To Age Beautifully

Our cabinets showcase the careful selection of natural and engineered materials to achieve the best possible look. While every effort is made to match wood grain as closely as possible, no two pieces of wood are exactly alike, even from the same tree. These differences in natural color and grain mean that each piece will respond differently to the finishing materials used. For example, close-grained woods absorb less and will vary in color from more open-grained pieces from the very same tree. It's these variations that contribute to the beauty and distinction of quality wood products. However, exposure to sunlight, smoke, and chemicals may cause some materials to fade or vary from their original color over time.

Cabinets, doors, drawer fronts, and accessories added at a later date may not exactly match cabinets installed now. For the same reasons, door samples or displays may not represent the exact color of cabinets received at the time of shipment. Consumers should also read all cleaning agent instructions carefully before application.

Due to changes that occur from natural and environmental factors a cabinet is exposed to over its lifetime, we cannot be responsible for variations that occur in the finish of natural and engineered materials as they age.

Wood Species & Materials

Timberlake Cabinetry incorporates solid hardwoods and hardwood veneers. These are natural materials with inherent variations. As such, our quality standards establish tolerance ranges for matching the hardwood pieces. Consumers should review actual samples in our selection centers and cabinet displays to help them establish realistic expectations of variations involving wood grain, color tones, presence of knots, and so forth.

These variations are at the heart of the unique natural beauty of finished hardwood. In addition, exposure of wood products to sunlight, some chemical agents, and smoke can cause wood colors to change over time.

Cherry

Cherry is a close-grained, multicolored hardwood with occasional pin knots and fine grain variations appearing as curls and waves. Features described below are typical and not considered defects:

- Small sap pockets, pin knots, and streaks
- Color ranges from pale yellow sapwood to deep reddish brown heartwood, with occasional shades of white, green, pink, or even grey
- Staining reveals subtle variations and colors that typically darken over time
- Variations within a single door
- May accept nicks and bumps over time

Duraform

Duraform uses highly-technological manufacturing processes to bond foils, vinyl films, and coatings to medium density fiberboard (MDF), high density fiberboard (HDF), and similar materials to achieve a product with exceptional stability, consistency and durability.

- The finish, color, and texture are consistent throughout the surface
- The surface is highly durable and easy to clean
- Materials are resistant to humidity and fading
- Refer to page 33 for standard cabinet box construction

Maple

Maple is an exceptionally hard, finely grained wood species with a fine, even texture. Darker stains will moderate the color variance, lighter stains mellow with golden hues over time. Features described below are typical and not considered defects:

- Light blonde tones to dark reddish brown tones
- Small mineral streaks of light blonde or reddish brown that darken with stain
- Wavy, curly bird's-eye, or burl graining as well as worm tracking across the grain that will darken when stained
- Variations within a single door

Oak

Oak is a prominently grained hardwood with pattern variations from straight grain to arcs. It is durable and forgiving of nicks and bumps, and mellows with golden hues over time. Darker stains provide a more uniform appearance. Features described below are typical and not considered defects:

- Natural oak colors range from light tans to deep reddish browns
- Streaks of yellow or black mineral deposits
- Noticeable differences in color between open and close-grained areas which may be more evident with light colored stain
- Variations within a single door

Painted

Painted finishes combine hardwoods and engineered materials including solid wood, medium density fiberboard (MDF), high density fiberboard (HDF), and similar materials to achieve a product with superior stability, consistency, coverage, and durability. Features described below are typical and not considered defects:

- Joint lines caused by the natural expansion and contraction of wood
- The natural aging process may change the tone of paint colors over time

Thermofoil

Thermofoil is thick vinyl film bonded to warp-resistant engineered wood which allow cabinet doors and drawer fronts to exhibit the same styling and detail found in solid wood doors.

- The color is consistent throughout the film
- The core is medium density fiberboard (MDF) with a melamine back
- The surface is durable, easy to clean, and especially resistant to chipping and cracking

Overlay Dimensions

These illustrations specify the relationship between the cabinet face frame and standard overlay or full overlay doors. They show the amount of the cabinet face frame that is visible when standard overlay or full overlay doors are selected.

Full Overlay

Full overlay (FOL) doors are sized to cover nearly all of the cabinet face frame. Full overlay door styles require decorative hardware. **To facilitate proper door operation, include at least a 1" filler between the hinged side of full overlay door styles and deeper adjacent objects including cabinets, walls, appliances, and countertops.**

Standard Overlay

Standard overlay (SOL) doors are sized to show about an inch of the cabinet face frame, giving the door some visual depth. Some door styles do not require decorative hardware.

Timberlake Cabinetry®

Portfolio Select® & Portfolio® 5-Year Limited Warranty

Timberlake hereby warrants to the original homeowner, for residential applications only, that all cabinets and accessories manufactured and sold by Timberlake are free from defects in material and workmanship for a period of five years from the date: (a) that you purchase your new home, or (b) that you install new Timberlake cabinets or accessories in your remodeled home, as the case may be. This warranty is expressly limited to repair or replacement of the defective part at the discretion of Timberlake, and does not include labor for removal or replacement. This warranty does not extend to defects caused by improper handling, storage, installation, assembly or disassembly, intentional damage, product modifications, exposure to the elements including humidity which may result in warping or splitting, accidental misuse, abuse or negligence.

Natural woods may vary in texture, color and wood grain, and exhibit subtle changes as they age. For example, wood joints may eventually have visible cracking around the joint area and cabinet colors may darken or lighten over time. Sunlight, smoke, moisture, household cleaners and other environmental conditions may cause materials to vary from their original color and/or to warp, split or crack. These variations are considered to be the nature of the material in relation to its environmental exposure and are not covered under this warranty.

Additional Limitations and Disclaimers

TIMBERLAKE MAKES NO OTHER WARRANTIES OTHER THAN THOSE SET FORTH HEREIN AND ALL OTHER WARRANTIES ARE HEREBY DISCLAIMED. THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED IN DURATION TO THE LENGTH OF THE HOMEOWNER'S WARRANTY PERIOD. THE LIMITED WARRANTIES SET FORTH HEREIN ARE LIMITED TO THE FIRST AND ORIGINAL HOME BUYER, OR CABINET PURCHASER IN REMODELED APPLICATIONS, AS THE CASE MAY BE, AND ARE NOT TRANSFERABLE THEREAFTER. IN NO EVENT SHALL TIMBERLAKE BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES TO THE HOMEOWNER OR TO ANY THIRD PARTY, INCLUDING, WITHOUT LIMITATION, DAMAGES ARISING FROM PERSONAL INJURY, LOST PROFITS, LOSS OF BUSINESS OPPORTUNITY, LOSS OF PROPERTY, ECONOMIC LOSSES, OR STATUTORY OR EXEMPLARY DAMAGES, WHETHER FROM NEGLIGENCE, WARRANTY, STRICT LIABILITY OR OTHERWISE. Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the above limitations and exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.

Claims

All claims for defective cabinets and accessories must be submitted to Timberlake in writing and must specify the defects present in the cabinets and accessories. After Timberlake has had an opportunity to inspect the cabinets and accessories, they will, at their discretion, either replace defective cabinets and accessories or repair any defects in the cabinets and accessories. All claims must be submitted to the following address: Timberlake Claims Department, Post Office Box 1980, Winchester, Virginia 22604.

Warranty Information for Commercial Purchasers

To merchants who purchase Timberlake cabinets and accessories for resale in any form, including builders, dealers and distributors, Timberlake extends the following warranty: Timberlake will replace, without charge, any cabinet and accessory that is not saleable because of defects in material or manufactured workmanship discovered within one year from the date of delivery to merchant. Notice of claim under this warranty must be given promptly, in no case later than ninety (90) days after defect becomes known to merchant. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED. TIMBERLAKE HEREBY DISCLAIMS ALL IMPLIED WARRANTIES, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE REMEDY OF REPLACEMENT IS THE SOLE AND EXCLUSIVE REMEDY FOR TIMBERLAKE'S OBLIGATIONS ARISING FROM THE SALE OF ITS CABINETS AND ACCESSORIES. IN NO EVENT WILL TIMBERLAKE BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL LOSS OR DAMAGES, including, without limitation, costs of installation, removal or reinstallation, damage to other property, loss of profits, loss of goodwill, or other economic loss, whether such incidental or consequential loss or damage is claimed on account of breach of warranty, breach of contract, negligence, strict liability in tort, or any other legal theory. CABINETS AND ACCESSORIES SOLD FOR RESALE ARE ALL SUBJECT TO THESE TERMS, AND ALL OFFERS ARE EXPRESSLY CONDITIONED UPON ACCEPTANCE OF THESE TERMS.

STANDARD CABINET SPECIFICATIONS

KCMA Certified

All cabinetry manufactured by Timberlake is certified by the Kitchen Cabinet Manufacturers Association (KCMA).

KCMA sets the American National Standards Institute/ KCMA 161.1- 2000 uniform performance and construction standards for kitchen and vanity cabinets. The program is referenced by U.S. government agencies, architects, builders, remodelers, and other specifiers.

Cabinets that bear the KCMA seal of certification are recognized as a quality product with the ability to perform after a rigorous battery of tests, simulating years of typical household use. Tests are performed by approved third-party independent laboratories.

Timberlake is proud to display the KCMA seal of certification for cabinet construction.

Environmentally Responsible Stewardship

As a leading U.S. manufacturer of fine cabinetry, Timberlake, a division of American Woodmark Corporation, is committed to conducting business in a manner that both protects the environment and safeguards public health and safety. To achieve this end, the company proactively identifies potential environmental risks and monitors compliance with appropriate federal, state, local, and internal standards.

Timberlake has received certification by the Kitchen Cabinet Manufacturers Association (KCMA) Environmental Stewardship Program on all products. The certification was awarded based on compliance across a broad range of activity including air quality, product resource management, process resource management, environmental stewardship, and community relations.

Timberlake works with all suppliers to encourage sustainable forestry practices. Particle board and plywood are purchased from suppliers that meet the Composite Panel Association requirements for Environmentally Preferable Products including formaldehyde emissions that comply with ANSI standards.

Timberlake uses leading edge technologies to limit both hazardous and non-hazardous emissions, byproducts, and waste. Ongoing, formal programs identify opportunities for recycling and reusing materials. When waste ultimately requires disposal, steps are taken to minimize the environmental impact.

The American Woodmark Foundation supports local programs serving the community, including activities focused on maintaining the quality of life.

Timberlake is dedicated to doing our part in the preservation and sustainability of the environment.

Cabinet Specifications

In keeping with our policy of continuous product refinement, Timberlake reserves the right to change specifications in design and materials as conditions require.

Finishing Systems & Cabinet Care

Finishing Systems

The finishing systems used on our products are designed to ensure the beauty and durability of our cabinetry. State-of-the-art equipment allows precise sanding, filling, and finish coverage of each of our products.

TuffTech® Finishing System

Our TuffTech finishing system uses only 100% solids. This multi-step panel finishing system begins with three sanding operations followed by a top and bottom brush cleaning to provide a smooth surface for material adhesion. Next, an ultraviolet (UV) filler is cured using light ovens to seal the board completely. Once again the board is sanded and a waterborne adhesion material is applied and dried to provide an interlocking bond with the water-based paints. Depending on the product, two or three coats of paint are applied, dried, and then covered with a UV topcoat. This topcoat is made of acrylics and urethane and acts as a sealant to protect the paint.

Environmentally Responsible Finishing

Our panel finishing system uses only water-based paints and fillers, yielding neither hazardous waste nor water contamination. Our acrylic and urethane materials are 100% solids, dried using high intensity lights, yielding no atmospheric emissions. Our products are extremely resistant to stains and surface damage that can be caused by common household chemicals. Our products exceed KCMA and ANSI standards for resistance to stains like coffee, grape juice, and moisture.

Cabinet Care

Remove dust from cabinets frequently with a soft lint-free cloth. The cloth may be slightly dampened with water or a spray type dust remover. Do not use a paste wax type material. Wax build-up is difficult to remove and will leave a residue that attracts dust and moisture. Polishes containing silicon should not be used. Clean spills immediately. Use a clean cloth and mild soap if necessary. Wipe dry with a clean soft cloth. Do not use detergents, citrus, or ammonia based cleaners, steel wool, soap pads, or abrasive cleaners on cabinets.

Extra care should be taken that cabinet finishes are not exposed to heat in excess of 200° Fahrenheit (174° for thermofoil laminated door styles). Do not place or mount small appliances beneath wall cabinets. These appliances (such as coffee makers and toasters) can produce excessive heat, which can damage the finish of cabinets. Do not expose doors or drawer fronts (especially thermofoil) to heat created from self-cleaning ovens or ranges. A heat shield kit should be used when thermofoil cabinets are installed or mounted directly next to an oven or range. For more cabinet care information, please visit www.timberlake.com/care.

Allow Cabinets To Age Beautifully

Our cabinets showcase the careful selection of natural and engineered materials to achieve the best possible look. While every effort is made to match wood grain as closely as possible, no two pieces of wood are exactly alike, even from the same tree. These differences in natural color and grain mean that each piece will respond differently to the finishing materials used. For example, close-grained woods absorb less and will vary in color from more open-grained pieces from the very same tree. It's these variations that contribute to the beauty and distinction of quality wood products. However, exposure to sunlight, smoke, and chemicals may cause some materials to fade or vary from their original color over time.

Cabinets, doors, drawer fronts, and accessories added at a later date may not exactly match cabinets installed now. For the same reasons, door samples or displays may not represent the exact color of cabinets received at the time of shipment. Consumers should also read all cleaning agent instructions carefully before application.

Due to changes that occur from natural and environmental factors a cabinet is exposed to over its lifetime, we cannot be responsible for variations that occur in the finish of natural and engineered materials as they age.

Wood Species & Materials

Timberlake Cabinetry incorporates solid hardwoods and hardwood veneers. These are natural materials with inherent variations. As such, our quality standards establish tolerance ranges for matching the hardwood pieces. Consumers should review actual samples in our selection centers and cabinet displays to help them establish realistic expectations of variations involving wood grain, color tones, presence of knots, and so forth.

These variations are at the heart of the unique natural beauty of finished hardwood. In addition, exposure of wood products to sunlight, some chemical agents, and smoke can cause wood colors to change over time.

Hardwoods

Hardwoods have a dense structure and come from broad leaved deciduous trees such as maple, oak, birch, cherry, hickory, poplar, or ash species. We use a combination of these to achieve a great looking and highly durable product. Features described below are typical and not considered defects:

- Light blonde to dark reddish brown tones
- Small black and reddish brown mineral streaks or deposits that darken with stain
- Wavy, curly bird's-eye, or burl graining as well as worm tracking across the grain that will darken when stained
- Variations within a single door

Thermofoil

Thermofoil is thick vinyl film bonded to warp-resistant engineered wood which allow cabinet doors and drawer fronts to exhibit the same styling and detail found in solid wood doors.

- The color is consistent throughout the film
- The core is medium density fiberboard (MDF) with a melamine back
- The surface is durable, easy to clean, and especially resistant to chipping and cracking

Hinge allows less than $\frac{3}{16}$ " frame-to-door gap. Up/down adjustment of $\frac{1}{4}$ ". Hinges permit doors to open to approximately 105°. Exceeds industry standard for durability.

Side-Mounted Drawer Glides

This glide system features twin self-aligning side-mounted drawer glides. They are constructed of epoxy coated steel for quiet opening and closing. Rollers are made of Delrin for smooth operation.

Metal Shelf Rest

$\frac{1}{4}$ " steel, nickel plated. Standard feature on all wall cabinets, bookshelves and Open Frame cabinets.

Base Locking Shelf Rest

Locks shelves in place and prevents shelves from sliding. Designed to allow easy shelf removal. Molded from clear high-strength polycarbonate. Standard feature on all base and tall cabinets.

Mullion Shelf Rest

Allows for superior alignment of shelf with mullion. Metal construction. Six position adjustable. Standard feature on Mullion Frame cabinets.

Overlay Dimensions

These illustrations specify the relationship between the cabinet face frame and standard overlay doors. They show the amount of the cabinet face frame that is visible when standard overlay doors are selected.

Standard Overlay

Standard overlay (SOL) doors are sized to show about an inch of the cabinet face frame, giving the door some visual depth.

Timberlake Cabinetry®

Value Built® 2-Year Limited Warranty

Timberlake hereby warrants to the original homeowner, for residential applications only, that all cabinets and accessories manufactured and sold by Timberlake are free from defects in material and workmanship for a period of two years from the date: (a) that you purchase your new home, or (b) that you install new Timberlake cabinets or accessories in your remodeled home, as the case may be. This warranty is expressly limited to repair or replacement of the defective part at the discretion of Timberlake, and does not include labor for removal or replacement. This warranty does not extend to defects caused by improper handling, storage, installation, assembly or disassembly, intentional damage, product modifications, exposure to the elements including humidity which may result in warping or splitting, accidental misuse, abuse or negligence.

Natural woods may vary in texture, color and wood grain, and exhibit subtle changes as they age. For example, wood joints may eventually have visible cracking around the joint area and cabinet colors may darken or lighten over time. Sunlight, smoke, moisture, household cleaners and other environmental conditions may cause materials to vary from their original color and/or to warp, split or crack. These variations are considered to be the nature of the material in relation to its environmental exposure and are not covered under this warranty.

Additional Limitations and Disclaimers

TIMBERLAKE MAKES NO OTHER WARRANTIES OTHER THAN THOSE SET FORTH HEREIN AND ALL OTHER WARRANTIES ARE HEREBY DISCLAIMED. THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED IN DURATION TO THE LENGTH OF THE HOMEOWNER'S WARRANTY PERIOD. THE LIMITED WARRANTIES SET FORTH HEREIN ARE LIMITED TO THE FIRST AND ORIGINAL HOME BUYER, OR CABINET PURCHASER IN REMODELED APPLICATIONS, AS THE CASE MAY BE, AND ARE NOT TRANSFERABLE THEREAFTER. IN NO EVENT SHALL TIMBERLAKE BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES TO THE HOMEOWNER OR TO ANY THIRD PARTY, INCLUDING, WITHOUT LIMITATION, DAMAGES ARISING FROM PERSONAL INJURY, LOST PROFITS, LOSS OF BUSINESS OPPORTUNITY, LOSS OF PROPERTY, ECONOMIC LOSSES, OR STATUTORY OR EXEMPLARY DAMAGES, WHETHER FROM NEGLIGENCE, WARRANTY, STRICT LIABILITY OR OTHERWISE. Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the above limitations and exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.

Claims

All claims for defective cabinets and accessories must be submitted to Timberlake in writing and must specify the defects present in the cabinets and accessories. After Timberlake has had an opportunity to inspect the cabinets and accessories, they will, at their discretion, either replace defective cabinets and accessories or repair any defects in the cabinets and accessories. All claims must be submitted to the following address: Timberlake Claims Department, Post Office Box 1980, Winchester, Virginia 22604.

Warranty Information for Commercial Purchasers

To merchants who purchase Timberlake cabinets and accessories for resale in any form, including builders, dealers and distributors, Timberlake extends the following warranty: Timberlake will replace, without charge, any cabinet and accessory that is not saleable because of defects in material or manufactured workmanship discovered within one year from the date of delivery to merchant. Notice of claim under this warranty must be given promptly, in no case later than ninety (90) days after defect becomes known to merchant. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED. TIMBERLAKE HEREBY DISCLAIMS ALL IMPLIED WARRANTIES, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE REMEDY OF REPLACEMENT IS THE SOLE AND EXCLUSIVE REMEDY FOR TIMBERLAKE'S OBLIGATIONS ARISING FROM THE SALE OF ITS CABINETS AND ACCESSORIES. IN NO EVENT WILL TIMBERLAKE BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL LOSS OR DAMAGES, including, without limitation, costs of installation, removal or reinstallation, damage to other property, loss of profits, loss of goodwill, or other economic loss, whether such incidental or consequential loss or damage is claimed on account of breach of warranty, breach of contract, negligence, strict liability in tort, or any other legal theory. CABINETS AND ACCESSORIES SOLD FOR RESALE ARE ALL SUBJECT TO THESE TERMS, AND ALL OFFERS ARE EXPRESSLY CONDITIONED UPON ACCEPTANCE OF THESE TERMS.
