 March 13, 2025 1100-1130
 Teleconference

Members present: Amanda Tabin, Jamie Armbruster, Kari Rickert, David Rae, Rachel Symons, Gina Brandl, Jenny Blenker, Adrienne Schroeder, Michelle Armstrong, April Bauch, Dawn Everson

Chair: Andrea Hebert

Recorder: Andrea Hebert

Call to order	Andrea Hebert
Data Review	Reviewed trends in data through Q4 2024, noted undertriage higher in region than state, again undertriage is looked at using ISS's, would ask that each hospital reviews undertriage data and goal is < 5% undertriage, if higher than this or need help in how to look at this data or drill your data reach out to any of us from Level 2's i.e. Andrea, Gina or Rachel and we would be happy to help you
Injury Prevention	Stepping on programs, aging and disability resource center, fallwi.org is great resource, reach out to Amanda/Gina, others who may be stepping on trainers if you need any help with this or feel you want to offer courses to your areas. Jenny shared she would be interested in finding out what's going on in portage and help promote stepping on in portage. Amanda will reach out.
PI NC RTAC 2025 PI plan	Reviewed and all in agreement with plan
NTDB updates	Michelle reviewed NDTs changes. Highlighted some significant changes you may see in registry or different data fields i.e.. Inclusion criteria: If pt comes in on Hospice with qualifying injury, and admitted or DC home, pt is included, in past we did not include them. New data fields: Intubation PTA (ETT, trach or cric only), Primary Medical Event (seizure, CVA, MI, arrhythmia, syncope, stroke, hypoglycemia) and needs to be documented in med record.
