

More or Less

By Darrell Johnson

Chorus:

More or less,

Plus or minus,

Add subtract,

They're math's finest way to figure out how much

The way to figure out what's what

More or less,

Plus or minus,

Add subtract,

They're math's finest way to figure out how much

The way to figure out what's what

(Add it up!)

Verse 1:

2 plus 2 is 4; you take the 2 and you add 2 more

It works for any number pair, you put the plus in the middle and you are there

(Take away!)

Use the minus to take away, it's called subtraction and it's here to stay

Like 4 minus 3, it equals 1, you just take away 3 from the 4 and you're done

Chorus:

More or less,

Plus or minus,

Add subtract,

They're math's finest way to figure out how much

The way to figure out what's what

More or less,

Plus or minus,

Add subtract,

They're math's finest way to figure out how much

The way to figure out what's what

(Add it up!)

Verse 2:

5 plus 4 is 9 (Bring it down!)

9 minus 4 is 5 (Add it up!)

11 plus 10 is 21 (Bring it down!)

21 minus 10 is 11 (Add it up!)

114 plus 86 is 200 (Take away!)

200 minus 86 is 114

Flip the numbers around going up or down

By using plus or minus you're homeward bound

Chorus & Outro:

More or less,

Plus or minus,

Add subtract,

They're math's finest way to figure out how much

The way to figure out what's what

More or less,

Plus or minus,

Add subtract,

They're math's finest way to figure out how much

The way to figure out what's what

(And we're out! Oooooooh....ooooooh)

If you think adding and subtracting is cool, wait 'til you start multiplying and dividing....yeah!
