

# Height Guard Clearance Structures

These economical clearance structures are perfect for facilities that need advance height warnings to avoid expensive damage to structures and vehicles. Includes a Height Guard Clearance Bar to hang to any needed height.

- Vertical post: 10' Tall, Horizontal beam: 10' Long, 5" Tall and 2" Thick.
- Mounting plate is 11-3/4" x 11-3/4" x 1/2".
- Manufactured in two pieces from heavy aluminum.
- The HDPE Height Guard clearance bar can be labeled using the graphics kit.

Graphics Kit

The J Anchor Assembly Kit assists with mounting the Height Guard Clearance Structure. It contains galvanized J anchors bolted to a CNC cut template which matches the steel foot plate of the structure.

It is recommended to use Sonotube® filled with foundation grade high strength concrete with steel rods enforcement. 30" deep or 4" deeper than local frost line.

## Standard Clearance Structure

## Arched Clearance Structure

For an enhanced look and greater functionality, consider the Arched Clearance Structure for added safety and better traffic flow. Includes a Height Guard Clearance Bar to hang to any needed height.

- Vertical post: 10' Tall, Horizontal curved beam: 9' Long, 4" High, 3" Thick.
- Mounting plate is: 11-3/4" x 11-3/4" x 1/2".
- Manufactured in two pieces from heavy aluminum.
- The HDPE Height Guard clearance bar can be labeled with the graphics kit.

Both Clearance Structures feature a finish option of milled silver aluminum or baked enamel in black, blue, green, red, white and yellow. When ordering, please specify the post orientation as either the driver or passenger side.
