What to Expect

1. Homeopathic Intake:

This is a comprehensive appointment where we'll explore your main concerns, overall health, and personal characteristics in detail. After your session, I'll carefully review everything we discussed to select the most fitting remedy for your unique needs. Once chosen, your remedy (or remedies) will be mailed to you and billed separately. If any additional information is needed, I may reach out by phone or email during this process.

2. Follow-Up Appointment:

Your follow-up appointment is scheduled about **4–6 weeks** after your intake to assess how your body is responding to the remedy. This visit typically lasts **30–45 minutes** and gives us time to review any changes, improvements, or new patterns that have emerged so we can adjust your care as needed.

🌟 *Recommended:* Give homeopathy around **six months** to see clear, lasting results. Some clients notice improvement quickly, while others experience gradual change as the body heals more deeply over time.

3. Acute Care:

Acute care addresses short-term, sudden conditions such as colds, flu, injuries, bites, or toxic exposures. These consults help your body recover more quickly while also strengthening your overall constitution and immune system. Each acute event offers an opportunity for your body to build resilience and improve long-term health.

The **acute consultation fee includes my ongoing support and follow-up** until the acute episode has fully resolved, so you're not left to navigate it alone.

Acute consults are available during regular business hours (**9am–5pm**). Messages or emails received after **3pm on Friday** will be returned **Monday**, unless after-hours care is requested. Remedies are billed separately.

4. After-Hours Acute Care:

After-hours acute consultations are available **after 5pm on weekdays and on weekends** for urgent situations that can't wait until the next business day. Just like standard acute care, the **after-hours consultation fee includes my ongoing support and follow-up** until the acute issue has resolved.

These consults ensure you have access to care when you need it most, even outside regular hours. Remedies are billed separately.
