Wi

Willow

Wi Willow loves to go “Treeventures wherever he is needed. From helping friends to assisting strangers, Wi gets the job done. Here are some words to describe Wi:

- Treemendous
- Treerific
- Treemazing
- Treespectable

What is a Treeventure?

Glad you asked

It is the ability to use your imagination in ways that stimulate fun, learning, adventure and being helpful.

The word "Treeventure" is rendered in a large, bold, black, 3D-style font. Below the main text is a lighter, semi-transparent reflection of the same word, creating a sense of depth and shadow.

It is time for you to meet the tree with the
biggest heart – Wi Willow

Hello everyone, I am Wi Willow

I am a tree.

I am not some ordinary tree.

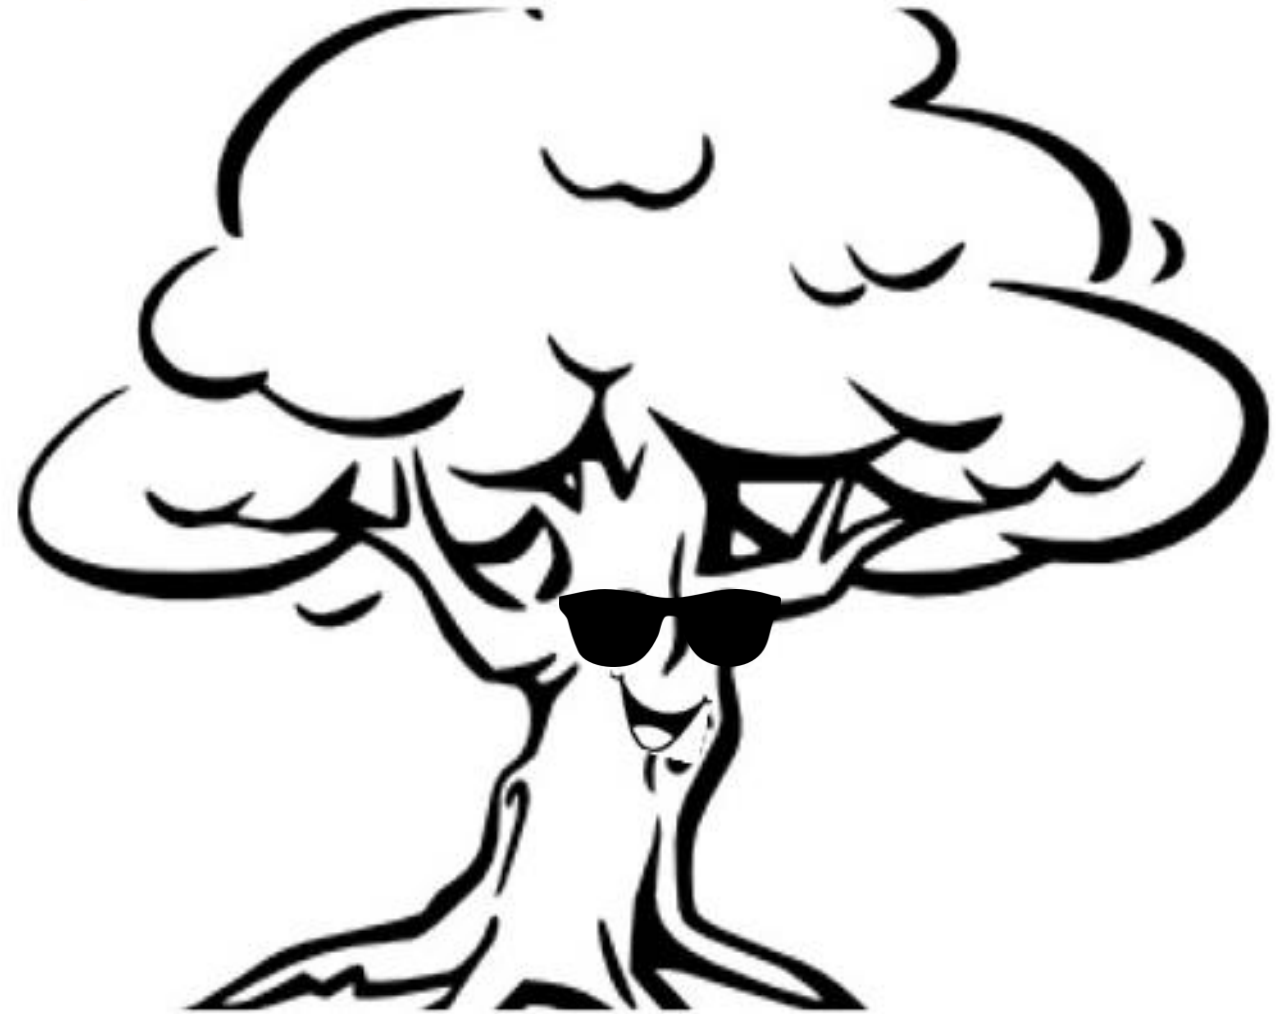

I am a special tree.

I am going to show you all the neat things
that I can do as a tree.

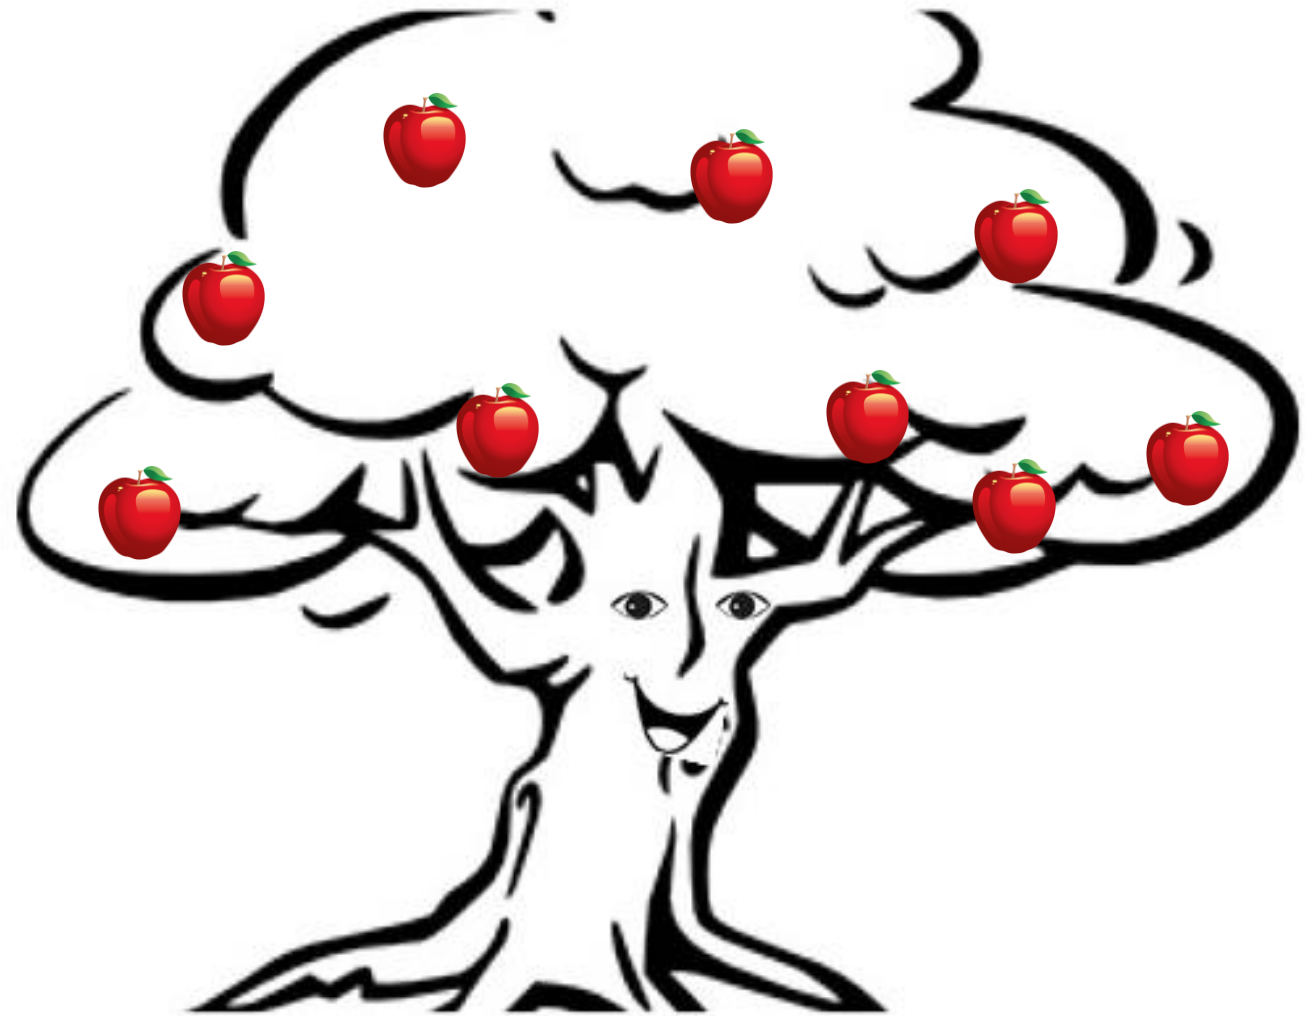

On a very hot day when the sun is high and, in the sky, I can keep you cool and dry.

Did you know that I can become a home to
the birds that fly in the sky. I can also be
resting place for them to lie

I can be a source of food for those who like my fruit or if you prefer you can nibble on my leaves.

Some people prefer to climb on my limbs or even build tree houses in between my branches.

Did you Know that by looking at me you can tell the season. Winter, Spring, Summer and Fall, I can let you a little something about them all.

Winter

Spring

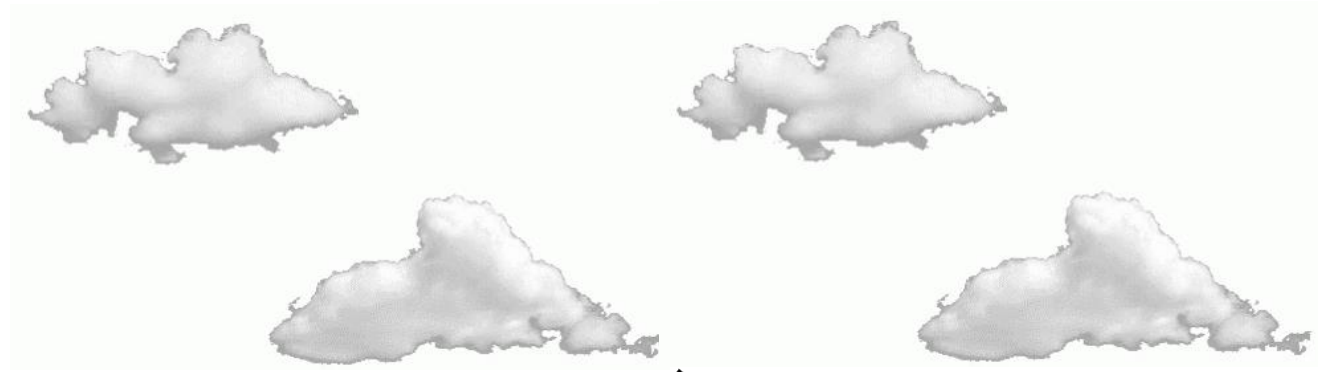

Summer

Fall

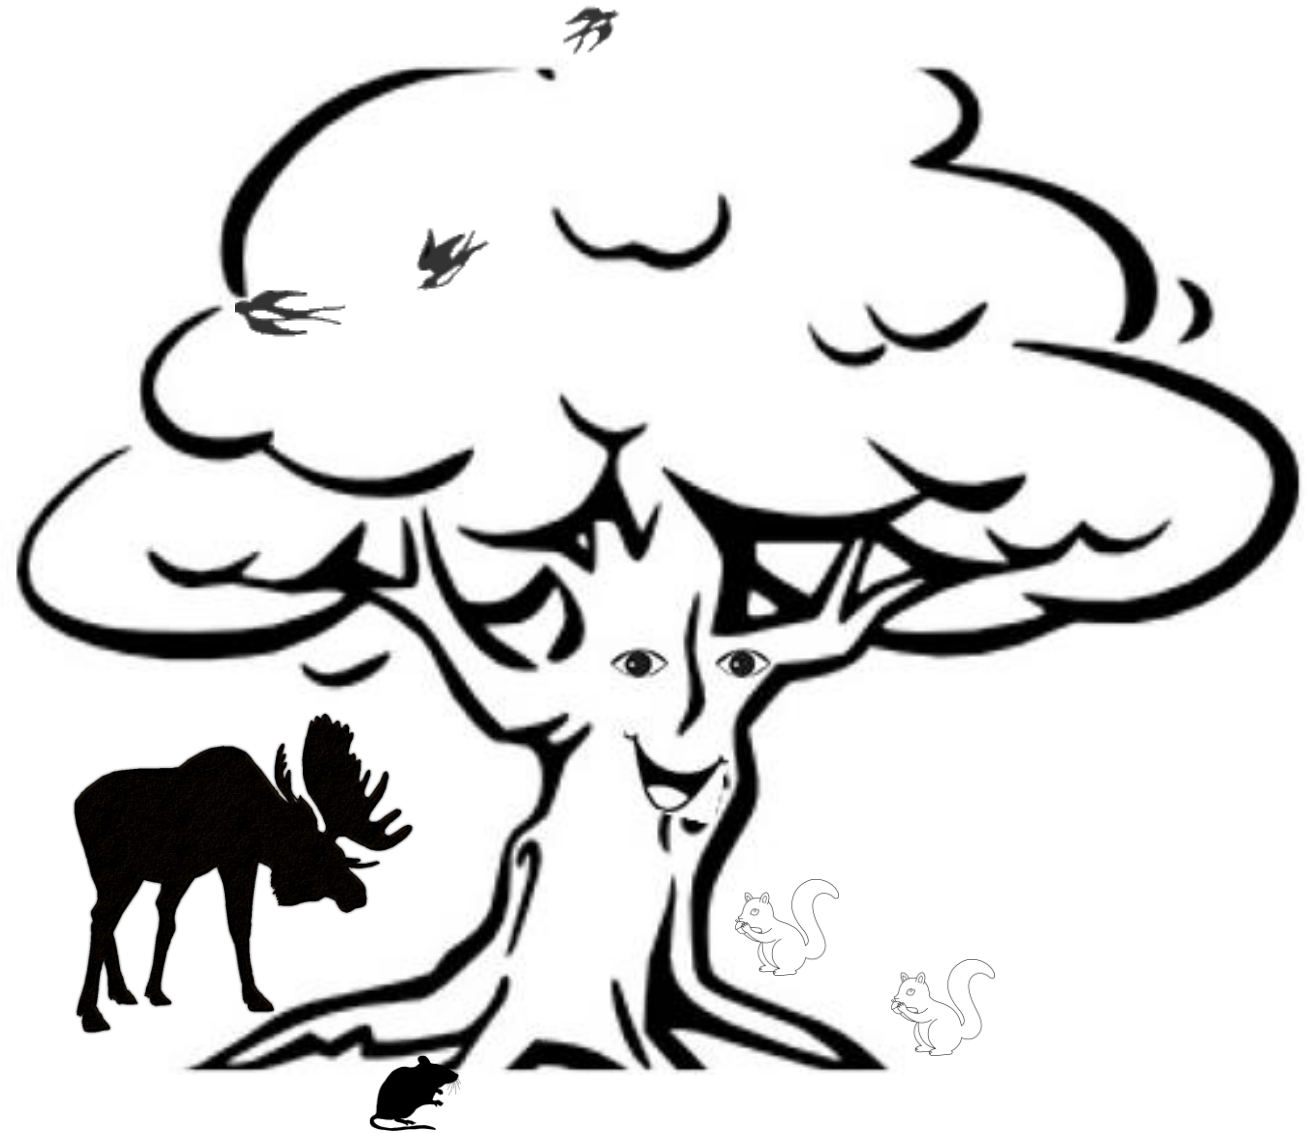

Nothing says beauty until you see
me in full array. In a neighborhood,
forest or on the side of a mountain,
I am on display.

I use my roots deep in the ground to prevent soil from running around.

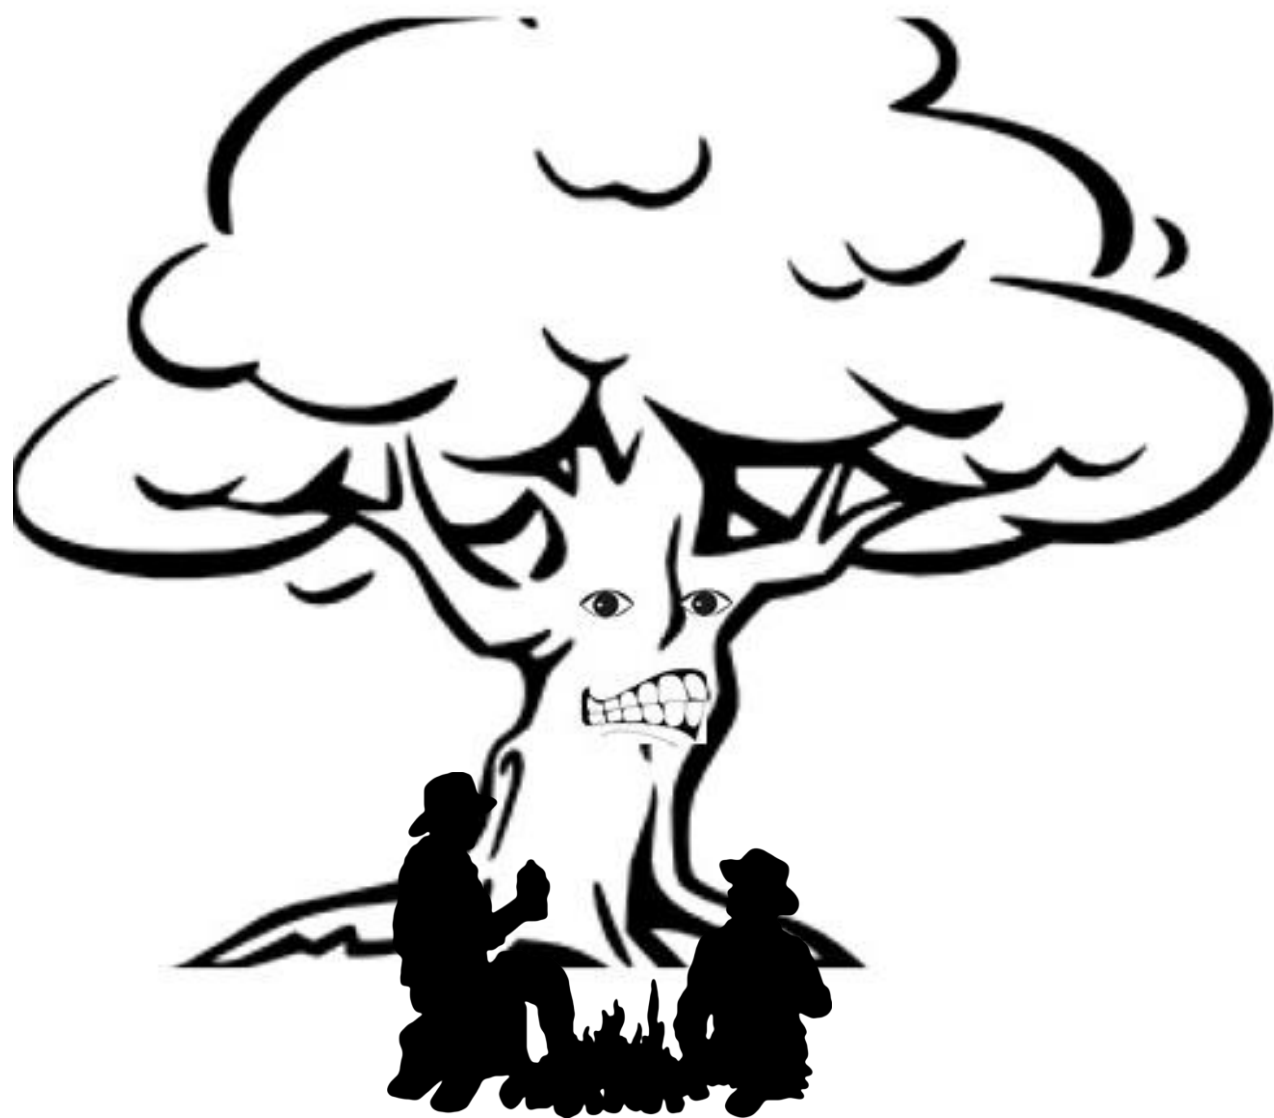

Sometimes I am used for special protection for various animals and insects to keep them safe

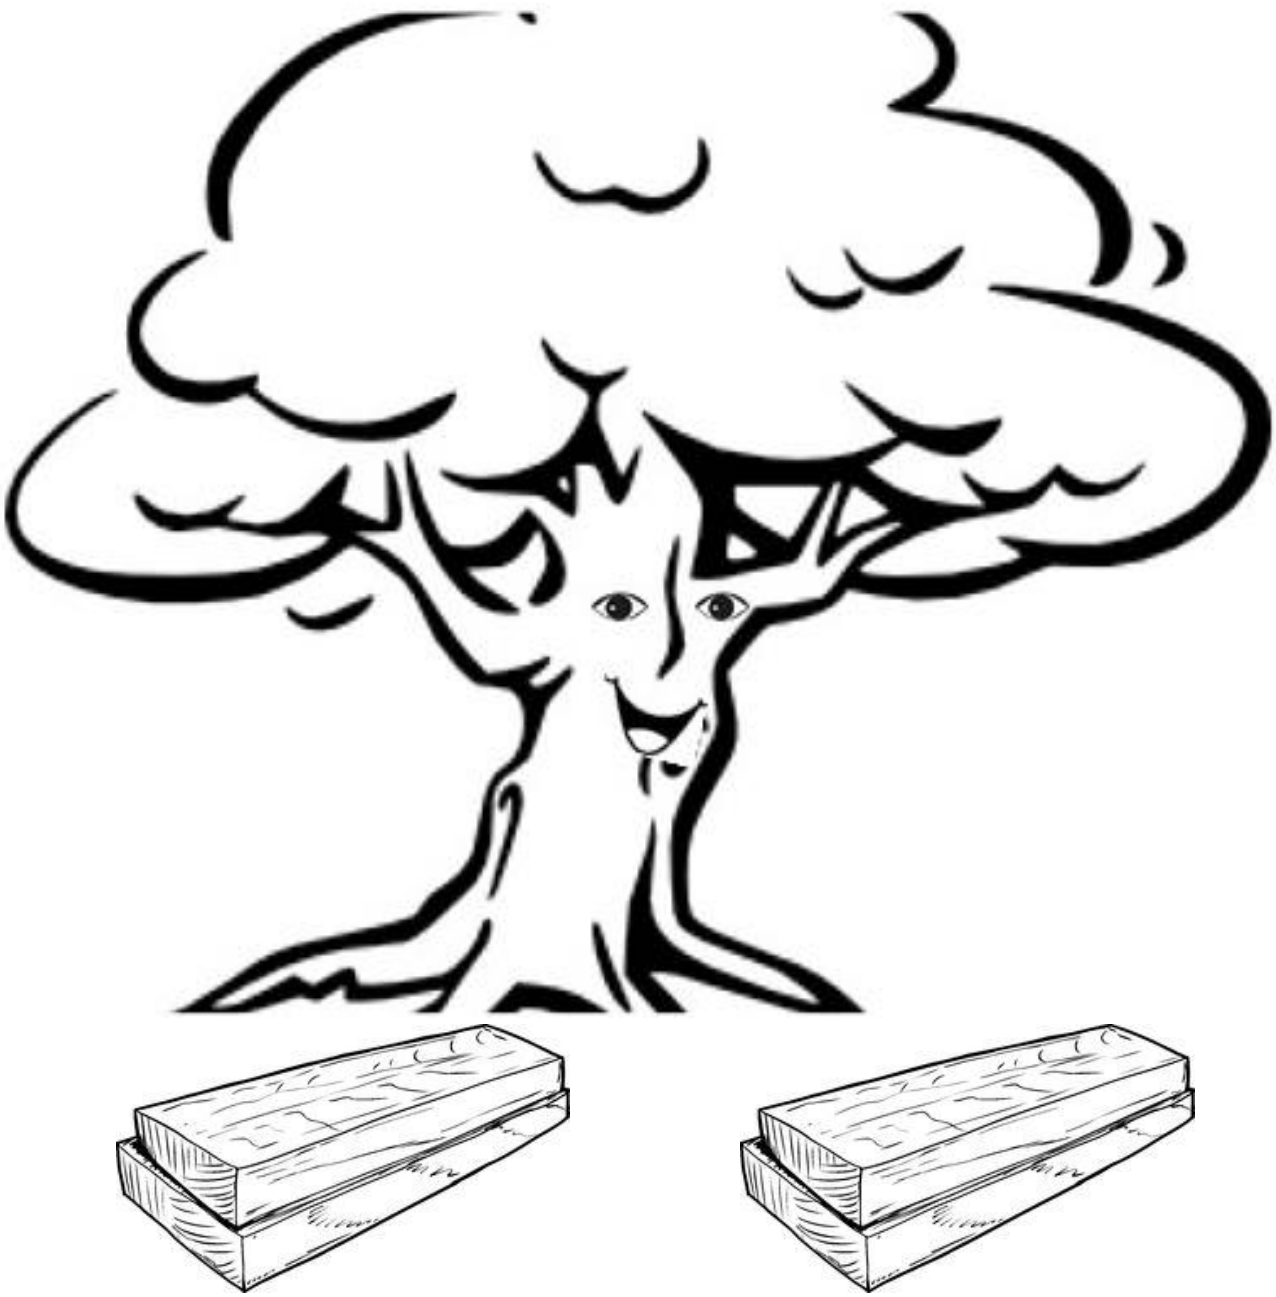

Did you know that I produce oxygen for you to breath? I have my own special way of producing it. I have been doing it for a long time.

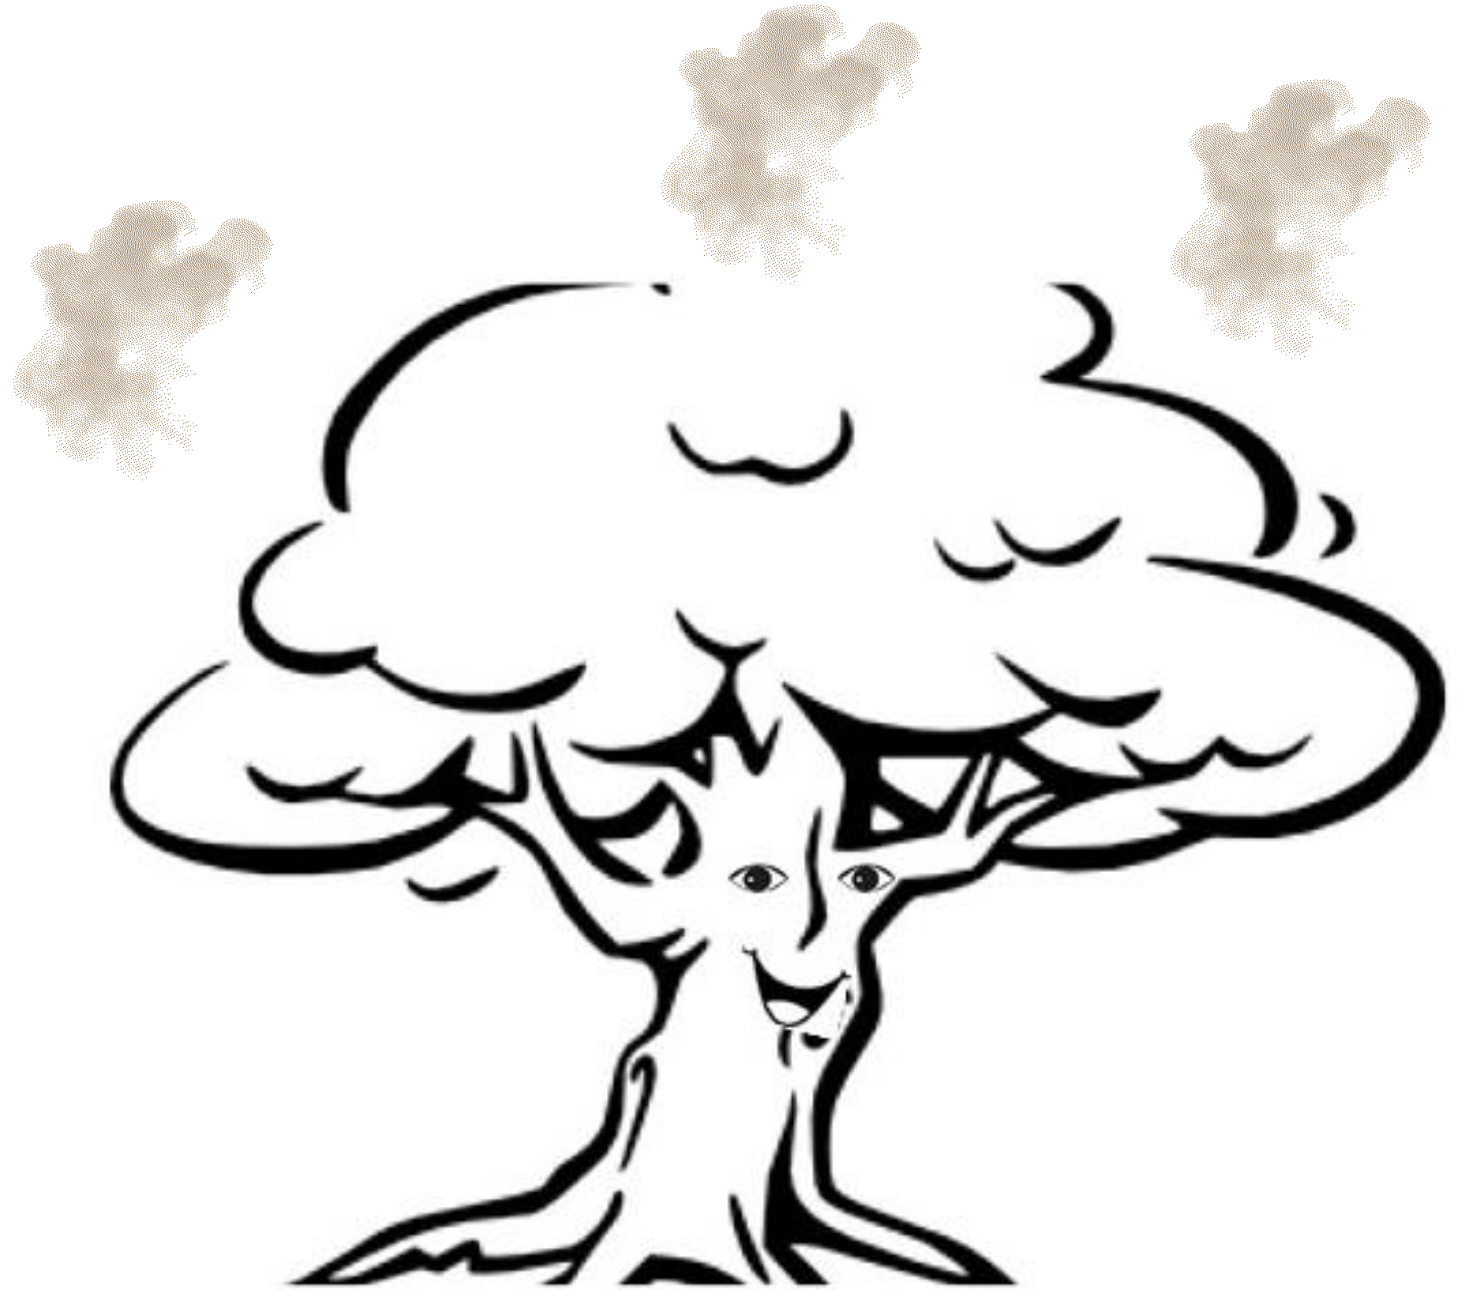

Everyone likes a nice fire in the fireplace. My branches will keep you nice and warm on a cold winter night.

If you live in a home brick or wood. I can make up
the frame to keep it standing tall.

Did you know that I can absorb water and put it back in the air as oxygen and water vapors?

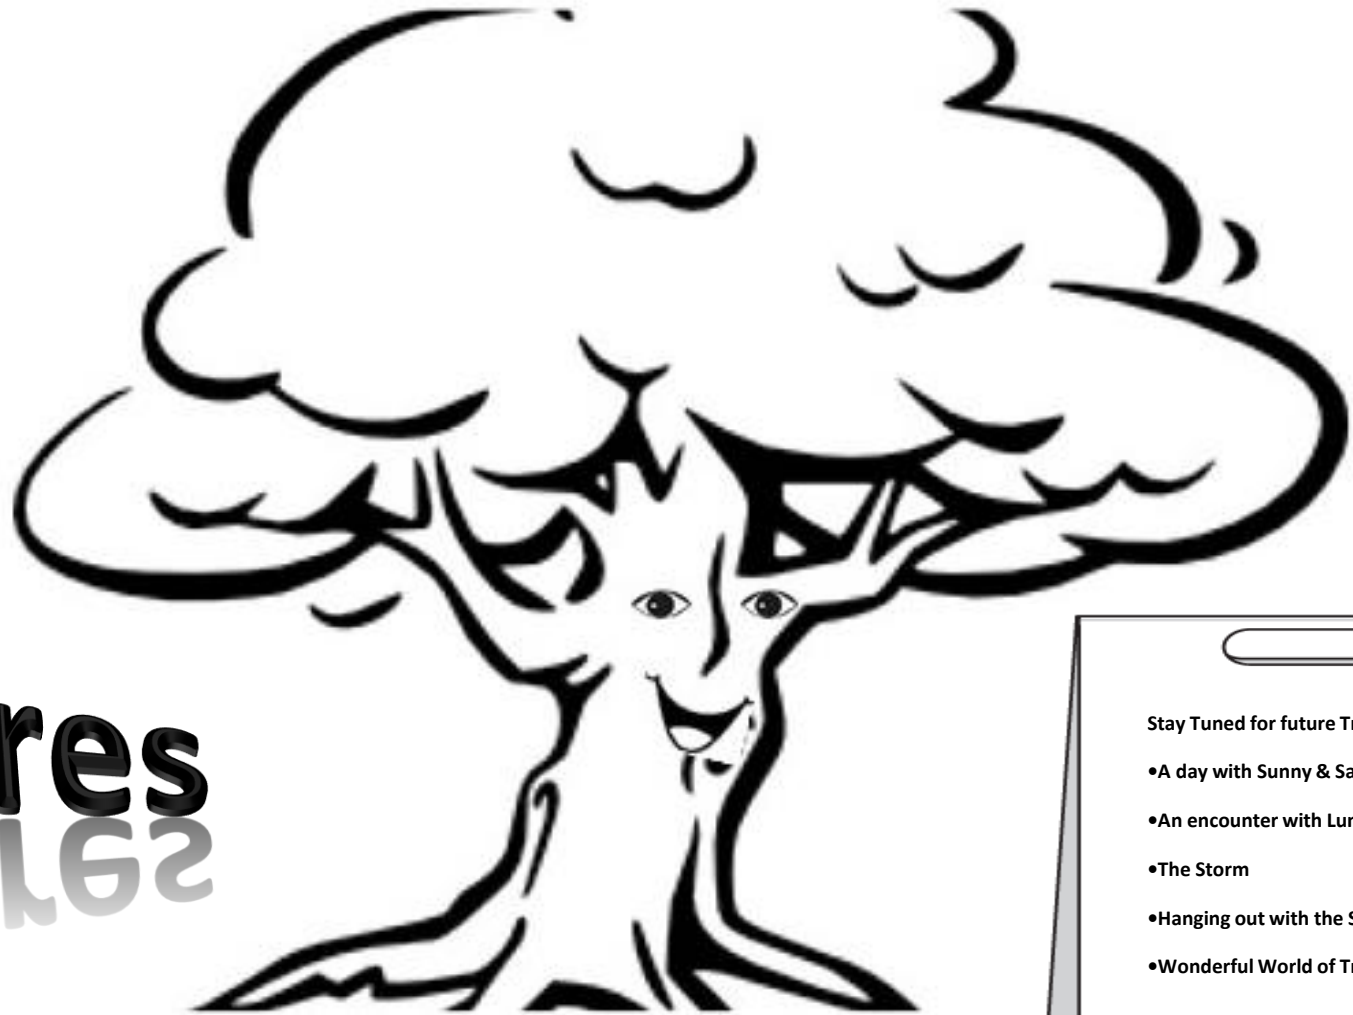

Now you see just how special I am.

So, that was little bit about me but that is only the beginning. Stay tuned for more treeventures from your new friend Wi Willow.

Author's Notes

Imagination is such a beautiful gift we can allow a child to have with no limits. The process of curiosity is a natural stage of development for children. They are natural-born scientist and investigators. It is our responsibility to foster and nourish those innate skills in our kids. So, go grab those pots and pans or a box and start using those beautiful, colorful, and creative imaginations!
