INTRODUCING DR. ITIEL DROR

Expert Evidence on Trial: Unearthing Bias in Expert Testimony

We have a one-of-a-kind experience for you! Dr. Itiel Dror is a world-renowned cognitive neuroscientist who specializes in addressing the cognitive bias of experts. Dr. Dror has consulted with the Los Angeles County Sheriff and the Los Angeles PD, as well as the California Department of Justice, to improve their protocols, and will share his unique perspective about challenging opinions from these experts. Having published more than 150 peer reviewed articles (cited over 14,000 times - source Google Scholar), he has unique insights into nearly every expert domain that impacts our clients. You can review an example of his work [here](#).

Dr. Itiel Dror has been the leader in this field for decades. He comes to us from London, England. He will be in Los Angeles four times in 2026 to share, with as many of us who take advantage of the opportunity, how to identify and expose when expert opinions are biased. ***A digital form to reserve your spot for these practice (life)-changing events will follow soon!***

He Will Do This In 2 Different Formats:

1. Four (4) one-day interactive conferences between January and September to reach as many people who deal with experts and experts reports and testing as possible.
2. Six (6) two-day workshops limited to 20 people to practice crafting questions, writing motions, and building arguments to challenge these tainted results that arise in our cases.

Save These Dates:

Please Save the Dates of January 12 -or- January 13, 2026, for one of the 1-day conferences, and/or **January 15-16, 2026**, for the two-day workshop. If you cannot attend any of these sessions, do not despair! There will be more conferences in March, May, and another time this summer/fall.
