Replace Your Worn Feed Plates With Durable Poly!

SICKLE CONVERSION

EASY CUT II
by SCHUMACHER.

Easy Cut II kits are available for almost all types of combines and headers.

- One sectionalized knife assembly
- Roller guides (where possible, otherwise wear plates)
- All hardware

The one up, one down section mounting on the knife and various options of section serrations provides for optimal cutting performance in a variety of crops.

Because the knife is trapped in the Easy Cut guard, no hold downs or wear plates are required, eliminating time consuming adjustments: a source of trouble and costly replacements. Also the knife can't "buckle" and break between hold downs.

Maintenance of the Easy Cut II system:

Because only a few different parts are used, most parts are common for many platforms; worn parts are easy to exchange. It takes very little time to check the cutting system periodically for wear. All parts are available through a wide network of dealers especially during harvest. Parts are readily available year round.

The advantages of the SCH Easy Cut II system:

- Extremely low maintenance, because no hold downs or wear plates are used, no adjustments necessary
- Very robust system, especially when used in wide platforms
- Superior cutting, even in the most difficult conditions
- Modular design

EXCLUSIVE

Custom Designed 2 Pc. Sickle For MacDon Heads

**NEW
ITEM**

Many Growers who own a MacDon Draper head have been commenting through the years about excessive bolt breakage on their sickle. Through our research we have found some common results. Due to the speed of the sickle needing to run at 600-650 rpm's to maintain desired ground speed, this adds additional stress to the 12-24 bolts used for the sections.

Most manufacturers that run a sickle at these higher speeds use heavier bolts for their knife backs and sections.

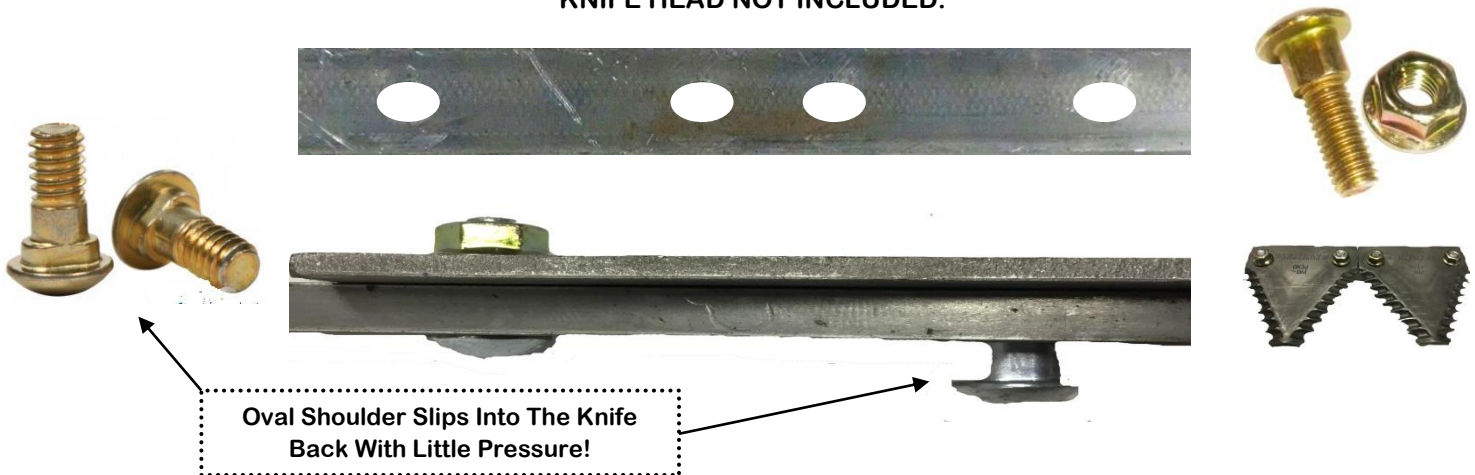

We at R.E. Skillings Supplies Inc. have come up with a sensible solution for the bolt issue.

"THE *SKILLKUT* SICKLE"

Benefits of Our Sickle:

- 6mm.(HEAVY DUTY) Diameter Section Bolts instead of 12-24 smaller bolts.
- Oval shoulder bolt design will speed up changing a broken section. No more pounding out bolts to pull out the section. The oval shouldered bolt will simply drop out the bottom and make section change quicker.
- 10' long Reinforcing Straps installed under the knife head area instead of connector links.
- Choice of section available: Tiger Shark (super aggressive), **SKILLKUT** (Our Section Of Choice), or the Super Seven (Standard) sickle section.
- Redesigned Sickle Splice Kit Making Repair Simpler And Faster.

*KNIFE HEAD NOT INCLUDED.

“THE PADDLE” TINE FOR A CHANGE!

Increase your harvest in light, sparse or short soybeans.
The 6” wide “Paddle” gives you the following advantages:

1. Increased Harvest
2. Improved Feeding
3. Cleaner Cutter Bar

EXCELLENT PERFORMANCE
IN NORMAL BEANS!

\$ 6.75 SALE

“GENTLE FINGERS”

With over 6 million, patented “GENTLE FINGERS” in the fields, we’re secure in stating we have the best designed nylon reel finger replacement available in the market place today. The patented “T Bar” design allows “GENTLE FINGERS” to bend uniformly from point of contact to the point of attachment, thereby eliminating a weak spot where the finger could bend again and again, and in time, break off during use.

- Eliminates broken cutter bar parts that are the result of getting steel fingers into the sickle.
- Eliminates the need for plastic tile over wooden slats since “GENTLE FINGERS” will not allow crop to wrap.

The following “GENTLE FINGERS” come complete with hardware & mounting instructions:

PART #	DESCRIPTION	PRICE
A. TGF1038-A	“Gentle Fingers” To Fit Wood Bats Box of 50	\$ 1.60 each \$ 1.50 each
