

# Custom Fit Equipment

for the Explosives & Mining Industries Since 1962

Custom Design & Build • Rebuild & Repair • Control Systems • Parts & Service

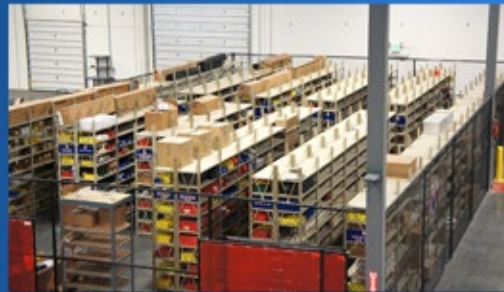

TRADESTAR™

+1-801-568-2000 [www.tradestarcorp.com](http://www.tradestarcorp.com)

## CUSTOM DESIGN & BUILD

- We have the capability to custom build bulk trucks for many applications, from ANFO to specialized emulsions, in whatever load capacity you need.
- Our designers are also familiar with the unique challenges of manufacturing rugged, reliable and user-friendly underground explosives delivery systems.
- We can build your emulsion plant design or create a solution for you.
- Our explosives pumping systems are among the safest in the world with redundant built-in safeguards.

## REBUILD & REPAIR

We can repair, retrofit, upgrade or convert your existing equipment in the safest and most economical way possible.

## CONTROL SYSTEMS

Our control system technology is unmatched in the industry. An intuitive human/machine interface reduces user workload and provides the high level of accuracy needed to control costs.

## PARTS & SERVICE

Our service professionals are dedicated to get you up and running with minimum downtime. You can depend on us for the correct parts when and where you want them.

## EXPERTISE

At Tradestar, we are problem solvers with the technical experience, equipment and ingenuity to get the job done. For additional information or to speak with an application expert, please email or call us!
