CONSUMER INFLATION RISES 2.5% IN AUGUST; CORE RATE AT 3.2%

The consumer price index (CPI) — a broad measure of how much everyday goods like gasoline, groceries and rent cost — rose 0.2% in August from the prior month. Prices climbed 2.5% in August from the same time last year, down from 2.9% in July.

Core prices, which exclude more volatile measurements of commodity-related goods such as gasoline and food, rose 0.3% in August from the prior month. The gauge was up 3.2% from a year ago.

The reading comes as Federal Reserve policymakers are set to hold a highly anticipated meeting in which they are likely to cut interest rates amid signs that the economy is cooling.

After the central bank kept interest rates at a 23-year-high range of 5.25% to 5.5% in July, Fed Chairman Jerome Powell signaled in an August speech at the Jackson Hole, Wyoming, conference that the "time has come" to cut interest rates.

High inflation has created severe financial pressures for most U.S. households, which are forced to pay more for everyday necessities like food and rent. Price hikes are particularly devastating for lower-income Americans, because they tend to spend more of their already-stretched paycheck on necessities and therefore have less flexibility to save money.

STRATEGICALLY FOR CREDIT UNIONS

Much of the rise in core inflation in August came from price for shelter, rising 0.5% from the prior month. Shelter prices are up 5.2% from a year ago and account for over 70% of the total 12-month increase in the core inflation index that excludes food and energy.

Other areas with notable price increases from a year ago include motor vehicle insurance (+16.5%), medical care services (+3.2%), recreation services (+3.2%) and education (+2.3%). After declining for each of the last five months, airline fares increased by 3.9% in August compared with July.

Consumers also experienced an increase in food prices, though the 0.1% monthly increase in August was less than the 0.2% increases that were seen in the prior two months. Compared with a year ago, food prices were 2.1% higher in August.

Food at home was unchanged from a month ago and is up 0.9% from last year, while food away from home rose 0.3% in August and is up 4% year over year.

Even if the Fed does trim its benchmark target, it might be only window dressing in that it most likely will have little impact on most consumer or mortgage rates - although it could lower credit card rates and other loans that are associated with prime rate pricing. Bank prime rate generally follow shifts in the overnight fed funds rate.
