

DMIST

Verbal Report for Transition of Care

Learn
More

D - Demographics

M - Mechanism of injury or illness

I - Injuries or illness

S - Signs and symptoms

T - Treatments

Effective and efficient communication is crucial for optimizing patient care and safety as well as fostering a culture of continuous improvement. The DMIST format has been recommended by the State Trauma Advisory Council and the EMS Advisory Board as a standardized process for verbal reports to other EMS providers and hospital staff.
