DESCRIPTION: Great looking and performing recurve. Bear Futurewood riser (resin impregnated compressed hardwood). It has no delamination; no cracks; limbs are straight. Overlays and tips are in great condition. No drilled holes. No chips, dings or cracks. no stress lines or crazing. A few minor scratches and scuffs here and there. Decals are in great shape. Except for the one flaw on the back of the limb this bow is in near mint condition. There are some blemishes over a 2 1/2 inch section of the upper back limb just above the riser (see pic). These are not stress marks, but likely a flaw in the underlying fiberglass resin. Does not affect performance of the bow. Overall, this is a really nice bow in excellent condition for its age.
