Henderson Lake Milfoil Project

2

GPS Locations of Milfoil Beds Plotted - 26 June 2010

- Global Positioning Points of visible Milfoil beds as of June 26th.
- Mapping done by the authors and are approximate sizes / areas of visible Milfoil beds and need to be calculated by aquatic nuisance treatment professionals.
- The large oval area is approximately 9.2 acres. The three circular areas are about 0.6 acre each, for a total of 11 acres.

(Areas calculated using the plotted “way points” and distances / lengths from Magellan software.)

Henderson Lake Milfoil Project

Status / Next Steps

- **Volunteer Representatives:**

- Henderson Beach (South) Sub: Al Johnston, Bill Olsen & Ron Hildner
- North Subdivision: Chris Fraser & Rick Wastricola
- Henderson Lake Heights: **OPEN**
- Allen Subdivision: Renee' Papillo

- **Financials:**

- Bank account opened at First Bank of West Branch
- Carol Olsen (Bill's "boss") has agreed to be treasurer. *(She's also treasurer of the church they attend and has been for years.)*
- Approximately \$1,400 in donations received to-date, even though we are not officially asking for donations (because we don't know costs yet).

- **Aquatic Treatment Contractors:**

- In discussions with two, well recommended treatment professionals
- Summer treatment costs ranging \$225 - \$250 per acre, or \$2,475 - \$2,750 plus DNR permits, plus postage for notifications for our estimated 11 acres. The mission is to try to get this done by mid-July before the Milfoil auto-fragments (seeds, so to speak).
- Next spring's systemic treatment strategy is still being developed, however it will involve treatment aimed at killing the Milfoil's root system in the areas treated. It could be 4 times the cost of this summers treatment.
