Advantages of Artificial Plants:

1. Low Maintenance

Artificial plants require no sunlight, watering, pruning and addition of fertilizers.

2. Security

You don't need to have someone coming in to water and maintain the plants.

3. Bring the outdoors inside

They have a calming effect and studies have shown that they improve productivity in the workplace.

4. Large selection

Pacific Silkscapes has a wide range of landscaping products for you to choose from.

5. Cost Effective and you get a return on investment

These plants may look upscale and expensive, but they are surprisingly affordable. **No maintenance!**

6. A great looking product

Artificial trees and silk flowers just keep getting more and more realistic.

7. Efficient Installation Process

The selection and installation process is efficient and controlled.

Advantages of A Custom Designed Artificial Tree:

Custom Silk Trees Are Growing in Popularity

1. At Pacific Silkscapes, we can manage and design the trees height and width to better manage the space they are being used in.
 2. We can create silk trees for indoor and outdoor plantscapes.
 3. We can design the canopy of the tree to blend in with the environment such as the door height, working with items on the wall such as paintings and security and safety equipment.
-
4. Pacific Silkscapes can create extra large trees with dramatic canopies you can not find elsewhere for your specific needs.
 5. You may want to bring color into the room and choose a Croton Tree or a Golden Aspen or a Yellow Birch tree as examples.
 6. You may want a branch to loft over a table or into another room. At Pacific Silkscapes we can design that tree to any specific requirement giving you a unique look.
 7. Some other suggestions could be to use Cherry Blossom trees for weddings, Birch trees for the Holidays and using trees to set the decor like a Palm tree for a tropical look or a Ginkgo tree for that Asian look or perhaps even an olive tree for a Tuscan look.
