

NEW PRODUCT RELEASE

Pop-Link® Mounting Systems by ADandD is pleased to announce two new posts to The PL Series Family; **THE KEIFER POST** and **THE BENT POST**.

NEW

Introducing **THE KEIFER POST**
Pop-Link® P/N PL-KPOST-BK

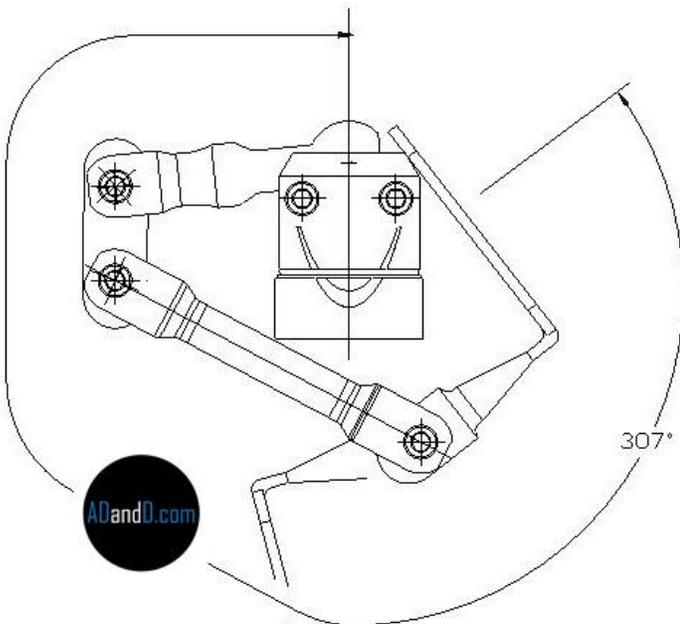

As simple as this may sound... this is a really, really a big addition to The PL Series Family. The simple things can sometimes take longer to appear than those with more complexity.

Most importantly, the PL-KPOST-BK can be a cost reduction to The PL Series combinations by the elimination of a knuckle (PL-KNK) while achieving a slightly greater angle of articulation. The knuckle will, of course, continue to play a major role in the product line.

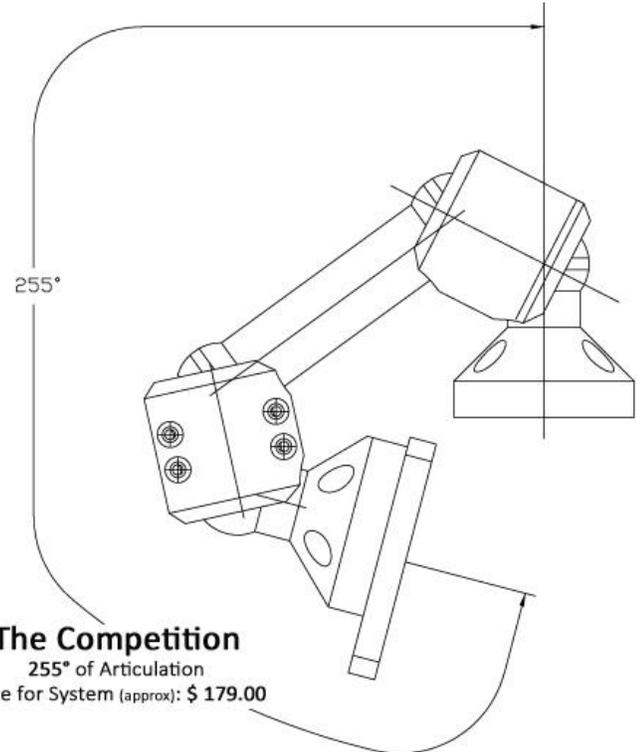

When coupled to the standard PL-BASE and the PL-SPOST-BK there are 4 pivot points, resulting in an amazing degree of articulation. The PL-KPOST-BK mounts to any bracket adaptable post (-BK) in The PL Series and is made of anodized aluminum with stainless steel fasteners. **List price is \$68.00.**

Compare Flexibility and Price... *We Beat the Competition!*

Keifer Post System
 307° of Articulation
 List Price for System: \$ 166.00

The Competition
 255° of Articulation
 Price for System (approx): \$ 179.00

Introducing **THE BENT POST**

Pop-Link® P/N PL-BPOST-BK

NEW

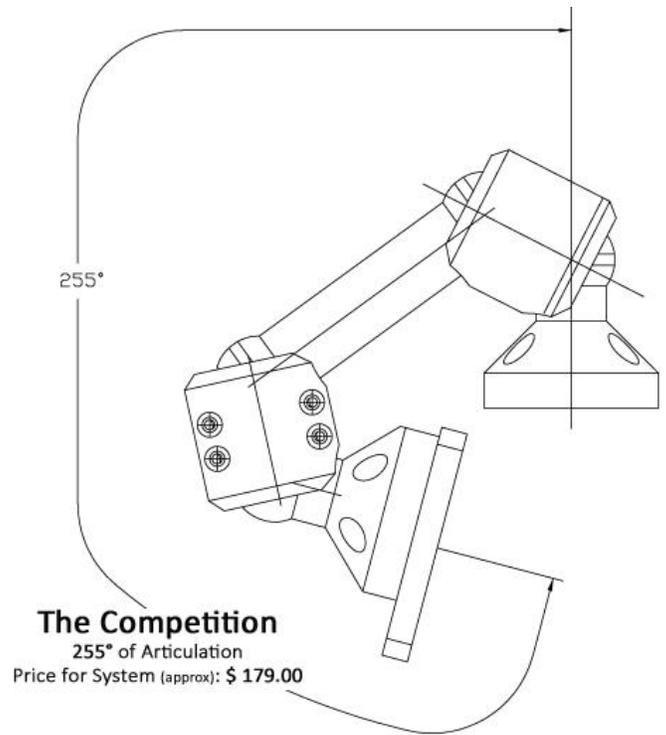

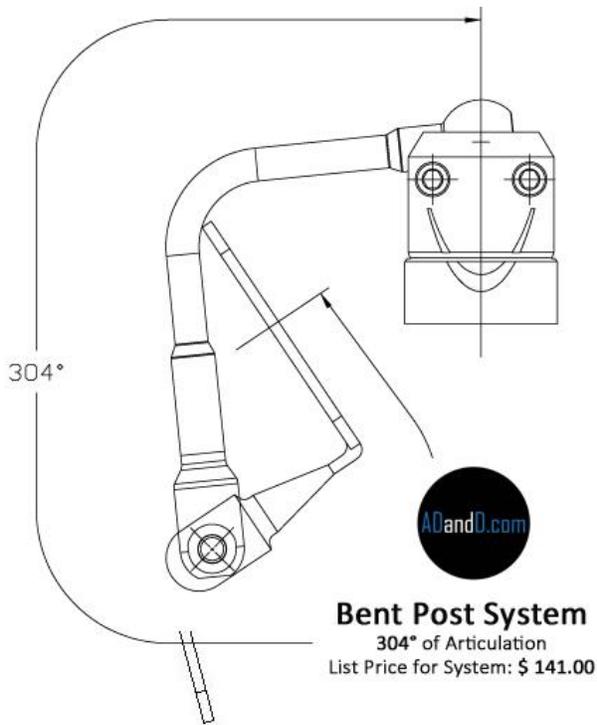

THE BENT POST, PL-BPOST-BK is another simple, yet great addition to The PL Series Family. The PL-BPOST-BK offers the most economic method to obtain a very high degree of articulation and at a lower cost, by the elimination of additional components such as a knuckle. The knuckle will, of course, continue to play a major role in the product line.

The PL-BPOST-BK incorporates a 90 degree bend to facilitate additional articulation. Even though it may not be the answer to all applications, it will be the solutions to many. The PL-BPOST-BK is made of anodized aluminum with stainless steel fasteners. **List price is \$68.00.**

Compare Flexibility and Price... *We Win, Again!*
