

The **Science of Spin_®** program is consistently **voted the #1 favorite** by students and teachers. Your school can enjoy this excellent program absolutely **FREE and TEKS Friendly!**

FREE OF CHARGE!

TEKS Friendly!

The program, as it is designed, consists of an entertaining and **educational assembly** (approximately 1-hour), followed by **hands-on instructional clinics** in your P.E. classes for the balance of the day. The first half of the assembly, suitable for all ages, is titled **SPIN FUN and SAFETY, encouraging the benefits of practice in ANYTHING in life.** The second segment, suitable for students in grades 3 and up, is the **SCIENCE OF SPIN.** Using multiple

demonstrations and class participation, students are introduced to the concepts of **gyroscopic stability, planes of spin, distribution of mass, transfer of energy, levers, friction, gravity, and potential & kinetic energy!** These concepts tie nicely into the **TEKS** objectives while the students are studying Force & Motion. (Visit www.scienceofspin.com to see document of TEKS Objectives identified by grade level) Schools using the **CSCOPE** curriculum will find yo-yos specifically identified in their written materials regarding simple systems.

P.E. teachers will be loaned an instructional video and a class set of yo-yos/spin tops so that they may continue the unit for one week following the assembly. An interdisciplinary curriculum guide featuring Social Studies (History), Language Arts, Science, Math and Art is also provided for free to the school staff.

PROGRAM OPTIONS:

- 1) Assembly and PE clinics (or multiple assemblies)**
- 2) Assembly only (or multiple assemblies)**
- 3) PE clinics only**
- 4) We're at your school all day. You tell us what you'd like us to do!**

BONUS OPPORTUNITY ** FREE Evening Presentation at PTA or Science Night if on same day **

The NO FEE option.

School's obligation is to provide for sales of yo-yos/spin tops through the PTA or other venue and allow practice during recess periods and/or P.E. classes for a minimum of one week.*

Sales: Yo-yo/spin tops are provided for the P.E. classes. It is not necessary for a student to buy anything. However, yo-yos/spin tops of the type used in the classes will be made available for purchase for five school days following the program. These fully guaranteed items sell for \$7.00 for the standard model and \$11.00 for the professional ball-bearing model. Should your school choose to increase the prices to your students by \$1 each, Science of Spin will donate 10% of the net amount to your school. *In either case, Science of Spin will be responsible to pay all Texas sales taxes on these items.* All items are guaranteed and manufactured by us specifically for this program to insure the highest quality and student's success.

Practice at recess: Yo-yoing/top spinning are great recess activities. Safety and appropriate use are stressed in both the assembly and the class instructions. When students are given their own "Spinning Zone" to practice, problems are virtually eliminated. *Two P.E. days of instruction per class can be substituted for the recess play if desired.

The FEE option. The all-day program is also available without the sales and recess play for the regular price of \$895 plus travel expenses for the entire day or \$450 for the assembly only.

This is NOT like any other yo-yo program you may have ever had! STUDENTS and STAFF agree...this is the BEST! Tell your counselor!

- Not just a show but an **ALL-DAY program** including an exciting, **ACADEMIC, SCIENCE** presentation PLUS **hands-on yo-yo instruction** for your students in their PE classes, making it a **positive experience**, rather than a frustration.
- A 'spintastic' performance of a champion with **20 years of teaching experience.**
- Exclusive state-of-the-art, take-apart yo-yos/spin tops **at reasonable prices** that solve tangled string problems, are pre-adjusted for beginner play and **guaranteed not to break. Absolutely NO minimum sales required.**
