

## New Portal

- Can view more than 50 listings in the desktop in News Feed
- Can include documents (portal preferences)
- Can include price and status history (portal preferences)
- Can include open house dates and times (portal preferences)
- Can include current tax year info – taxkey #, total tax and year, lot description, est. acreage, and zoning (portal preferences). Classic you can include the entire tax record showing past years data
- Cannot create custom collections (Classic can)
- Can share only 1 listing at a time (Classic can do multiple listings)
- Most Recent Search option for search bar does not bring up last search client performed – I got all active SF listings for MLS
- Close and Reset links in Filter Search button do not work
- When you log in, it brings up all active listings in the MLS – like on mobile (Classic brings up news feed)
- Cannot print listings (Classic can)
- Cannot make listing notes (Classic can)
- Most Recent link displays Agent's custom sorts
- View All for Collections is displaying carts I deleted a long time ago
- If you navigate the map away from the listings, they disappear from the results list
- When I viewed a collection that had listing statuses other than what was saved in my search, it routed me to the Portal dashboard – I'm assuming the collections do not retain these changed listings. **Testing**
- Don't have access to manually emailed listings or CMAs in the navigation panel (Classic can)
- In agent FlexMLS, manual Interactive Email ONLY has options for Documents and Open house – you lose all other options
- Lose ability to choose view, view sort, and Detail options / data sheets to display in Portal
- Most Recent Unsaved Search on Portal tab of Contact's file does not bring up last search – I got all active SF listings

## Classic Portal

- Cannot show agent listings on Portal dashboard
- Have to manually email documents to be seen in Portal
- Have to manually email history to be seen in Portal (but it's all edits – not just price and status)
- Have to set listing report to option with tax in order for tax info to be seen (but it's complete tax record – not just last tax amount for latest year available)
