Accessory uses are limited activities that are customary and incidental to residential use undertaken for the personal use and enjoyment of the residential occupant.

Attachment B Urban Sprawl Analysis

The Community Planning Act (Florida Statutes Chapter 163) requires future land use amendments to include an analysis to determine whether the proposed amendment contributes to urban sprawl. The proposed land use amendment does not display the sprawl indicators as identified in Florida Statutes Chapter 163.3177.9.a and listed below.

- Promotes, allows, or designates for development substantially areas of the jurisdiction to develop as low-intensity, low-density, or single-use development or uses.
 The application site of 4.6 acres does not comprise a substantial area of the city.
- II. Promotes, allows, or designates significant amounts of urban development to occur in rural areas at substantial distances from existing urban areas while not using undeveloped lands that are available and suitable for development.
 The subject property is located in an area that is already planned for development
- III. Promotes, allows, or designates urban development in radial, strip, isolated, or ribbon patterns generally emanating from existing urban developments.

due to being located within the Webster Joint Planning Area.

The amending of land use for this property should not create any of the design patterns listed above but instead creates a centralized node for development due to being placed in the Webster Joint Planning Area.

- IV. Fails to adequately protect and conserve natural resources, such as wetlands, floodplains, native vegetation, environmentally sensitive areas, natural groundwater aquifer recharge areas, lakes, rivers, shorelines, beaches, bays, estuarine systems, and other significant natural systems.
 - The subject property is surrounded by already developed land and so does not interact with any environmentally sensitive areas or major natural systems, and would be developed in a manner that is consistent with the Land Development Code.
- V. Fails to adequately protect adjacent agricultural areas and activities, including silviculture, active agricultural and silvicultural activities, passive agricultural activities, and dormant, unique, and prime farmlands and soils.
 - The proposed amendment should have no impact on bona-fide agricultural uses and looks to amend the land use that is consistent with the intended use and size of the property.
- VI. Fails to maximize use of existing public facilities and services.

 The subject property currently falls within the City of Webster utility service area and Joint Planning Area, and will be connected should the property be developed.
- VII. Fails to maximize use of future public facilities and services.

 The subject property will be expected to connect to current public facilities and services that are developed in the area.

VIII. Allows for land use patterns or timing which disproportionately increase the cost in time, money, and energy of providing and maintaining facilities and services, including roads, potable water, sanitary sewer, stormwater management, law enforcement, education, health care, fire and emergency response, and general government. Fails to provide a clear separation between rural and urban land uses.

The proposed land use amendment should not disproportionately increase the cost of public services in the area.

IX. Discourages or inhibits infill development or the redevelopment of existing neighborhoods and communities.

The requested amendment should not discourage infill development.

X. Fails to encourage a functional mix of uses.

The proposed amendment will not discourage a functional mix of uses.

XI. Results in poor accessibility among linked or related land uses.
The proposed land use amendment will not affect the accessibility of adjacent lands.

XII. Results in the loss of significant amounts of functional open space.

The proposed land use amendment should not result in the loss of significant amounts of functional open space.

Further, a future land use amendment is required to meet four or more criteria listed in FS 163.3177.9.b. The proposed land use amendment meets the following four listed criteria:

- (I) Directs or locates economic growth and associated land development to geographic areas of the community in a manner that does not have an adverse impact on that protects natural resources and ecosystems. The property falls in an area where such rural land use is expected, protecting the area outside it.
- (II) Promotes the efficient and cost-effective provision or extension of public infrastructure and services. The property falls under an existing utility service area and Joint Planning Area, resulting in efficient and cost-effective provision of public services if the property is developed.
- (V) Preserves agricultural areas and activities, including silviculture, and dormant, unique, and prime farmlands and soils. By falling within the Webster Joint Planning Area, the amendment will preserve agricultural areas outside the JPA.
- (VII) Creates a balance of land uses based upon demands of the residential population for the nonresidential needs of an area. This amendment would change the land use to a use that can support the residential needs for this area.

The proposed land use change does not demonstrate any of the characteristics of urban sprawl as defined by the applicable State Statutes.
