

# News Release

Pop-Link Mounting System, by ADandD, is excited to announce an addition to The Bracket Series: The PL-LB5.

This light bracket is compatible with Keyence CA-DRM20X and CA-DRW20X multi-spectral lights. The bracket is made from Stainless Steel and has a hole pattern that matches our HDPL-Ball Base (mounting hardware not included). It also mounts to the PL Series, but we recommended the HDPL for the size and weight of Keyence CA-DRM20X and the bracket.

This bracket has a list price of \$180.00. Please contact us with any questions... we look forward to hearing from you!
