ECONOMIC UPDATE AND ANALYSIS

20 June 2025

FED KEEPS KEY BENCHMARK UNCHANGED; INFLATION METRICS NEARING POLICY TARGET

Federal Reserve policy-makers chose to retain their benchmark overnight target rate unchanged. That target rate will stay in a 4.24%-4.50% span, still the highest since 2007.

The decision will have no impact on consumer financing rates in that there is little correlation between the two. However, prime rate does have a more direct correlation, so any downward shift could help to lower prime-based loans like credit cards and some equity lines of business.

The Fed has now gone six months without cutting the overnight rate. Inflation only rose 2.1 percent in April, the closest it's been to the Fed's target since prices first surged in the aftermath of the pandemic. Meanwhile, the nation's unemployment rate is holding at 4.2 percent, near the Fed's estimates of maximum employment.

Policymakers now expect unemployment to rise to 4.5 percent from its current 4.2 percent level. Inflation, meanwhile, is projected to heat back up temporarily to 2.5-3.0 annual pace.

All the while, economic growth is expected to slide this year, growing just 1.4 percent. But with the transition of the nation's manufacturing and service industry into a more effective economy that strengthens production and employment.

STRATEGICALLY SPEAKING

Judging by the Fed's own individual projections, we don't expect interest rates to come down very quickly but instead will become even more volatile. It should underscore the urgency for borrowers to aggressively pay down high-cost credit card debt and offers little hope of a significant drop in interest rates any time soon.

Tariff talk remains with fear-mongering directed toward seeing significant increases in prices that would be experienced at the producer level. We don't agree. In fact, the current economic climate and finiky consumer behavior would most like see much of the possible impact absorbed at the wholesale level - similar to what the economy had recently exerienced for nearly 15 years.

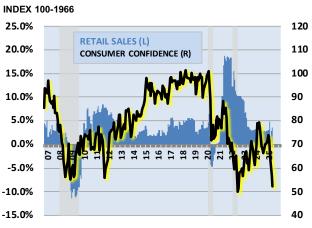

Moreover, tough tariff talk is geared mainly toward US manufacuturers for them to once again produce more in the US - in that products made in the US are not subject to tariffs. Still, most of the goods that are imported into the US are not final products but mostly raw materials and intermediate component parts.

Consumer spending remains moderately strong given the economy volatility but supported by solid wage growth. The pace of growth in retail sales was impacted by a decline in motor vehicles that was coming off a significant rise during the first quarter of 2025. This could tap down growth over the next couple of quarters that pent-up demand erased during the first quarter.

ECONOMIC RELEASES			
RELEASES THIS WEEK:	Latest	Projected	Previous
Retail Sales (Sep, YoY)	5.2%	5.1%	4.7%
FOMC Announcement	4.5%	4.5%	4.5%

RELEASES FOR UPCOMING WEEK:	Projected	Previous
Existing Home Sales (May)	3.95M	4.0M
Home Prices (Apr, YoY)	3.2%	3.4%
Consumer Confidence (Jun, 100=1985)	99.0	98.0
New Home Sales (May)	700k	743k

THE ECONOMY AND STRATEGIC ASSESSMENT

CURRENT PROFILE

Growth Outlook

Slower pace nationally with pockets of stronger demand and spending

Inflation

More members living paycheck -to-paycheck. This dilutes purchasing power and discretionary spending

Household Wealth

Boosted by improvement in capital market, home values and stable wage growth

IMPACT ON OUTLOOK

Growth

Local demand should be sufficient to satisfy pending loan and deposit growth

Inflation and Household Wealth

Expect pace of inflation to range between 2.3% to 2.9% .. Pace of home prices should slow ... Expect pockets of course correction in credit markets

Credit Risk and Liquidity

Two biggest concerns mounting delinquency & cash flow mismatch

IMPACT ON DEMAND

Growth and Liquidity

Volatility in core deposits remains thus creating unable share growth and potential mismatch between loan/share growth capacity

Credit Demand

Slight fluctuation between A- and C-quality Ioan applications. Pressure to compromise U/W should be avoided

Share Growth

Volatile core deposits and organic growth will determine permissible loan growth

ENTERPRISE RISK EXPOSURE AND STRATEGIC ASSESSMENT

ASSET & NET WORTH

Growth & Capitalization

Efforts should focus on net worth with growth tied to retaining a well-capitalized net worth (>7%)

Balance Sheet Allocation

Must have limited complexity but capable to adjust due to economic, risk pressure and reallocation

Liquidity

Monitor mismatch between loan and share growth .. Core deposit volatility continues in market ... Loan growth is dependent on share growth

RISK EXPOSURES

Enterprise Risk

To garner best balance between financial and member service, the focus must take into account all risk exposures

Interest Rate Risk

Retain risk-to-ST earnings no greater than -10% to -12% given +/-100bp shift and risk-to-LT earnings no greater than -30% given +/-300bp shift

Liquidity Risk

Retail surplus-to-assets no less than 9%; ST Funding no less than 12%

CREDIT MITIGATION

Credit Risk Exposure

High priority in 2025 ... 87% of new origination must be B+-quality or better ...

Allocation and Average Life

Prime quality must be no less than 92% of portfolio .. Average life must range between 2.7 and 3.1 years

Recommend risk classifications of A+ (730+), A (680-729, B (640-679, C (620-639

Loss exposure of Sub-prime may not dilute net worth below 7%

INTEREST RATES, PRICING SPREADS AND STRATEGIC ASSESSMENT

MARKET RATES

Benchmarks

Downward pressure on most treasury benchmarks with greater volatility on the long-end of the curve

Market Rates

Consumer rates will not experience as great a downward pressure as benchmarks... potential to 25 to 30 bp decline in vehicle loan rates

Greater volatility in mortgage rates with range between 6% to 7%

No change in core deposit rates but lower term CD rates

PRICING SPREADS

Effect on Pricing Spreads

Any downward shift in asset rates will be slower than benchmarks therefore relative value of credit -risk asset should increase.

No exposure in core deposit rates will see increase in relative value of core shares ... Improved liquidity profile and downward pressure on term rates should narrow funding spreads and potentially minimize the impact and need of promotional term CDs.

Largest impact from downward pressure comes from overnight cash

ALLOCATION & RETURN

Risk Allocation Metrics

Surplus-to-Assets: >9%
ST Funds-to-Assets: >12%

Vehicle-to-Loans: >60%<75%
RE Loans-to-Loans: >25%<50%
RE Loans-to-Net Worth: <275%

Core-to-Shares: >75%
Term-to-Shares: <20%

"Misery" Index: <0.80%

Outlook on Return

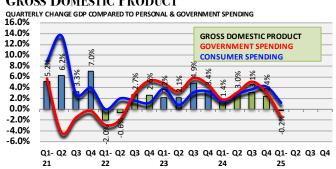

Marginal loan rates still higher than portfolio yields so even fewer originations might increase revenue
