Artichokes

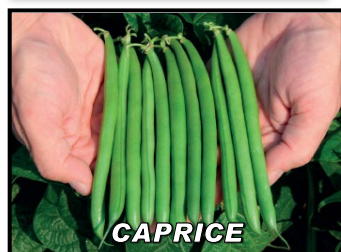

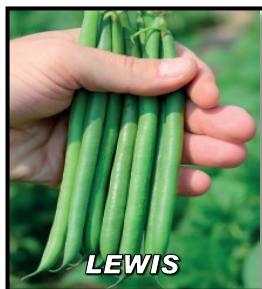

Artichoke		
Variety	Features	
Green Globe	L	Perennial plant valued for its tender, edible flowers. Globe shaped fruit is 2-5" in diameter with thick flavorful hearts. Medium deep-green with light purple tinge.
Emerald	M	Plant is open and erect; buds are on long stems for easy harvest. Fruits are oval in shape with a moist, nutty taste. Hearts are large and deep. The attractive glossy green color sets it apart from other varieties. Excellent taste and cold tolerant.

Beans

Beans - Bush Round Pod								
Variety	Relative Days	Pod Size	Pod Color	Seed Color	Sieve Size	Disease	U/M	Features
Blue Lake 274	52	6"	Dark Green	White	4	BCMV(r), NY15(r)	L	Blue Lake 274 is famous for yield, quality and flavor. Popular variety for roadside stands and local markets.
Valentino	 53	5.5"	Dark Green	White	3	BCMV(r)	M	Straight pods are well positioned to facilitate mechanical harvest. Sets well in warm conditions. Excellent quality.
Lewis	53	5.5"	Med Dark Green	White	3-4	BCMV(r), Psp (r) BCTV(r), Ua(r)	M	Early, attractive straight pod with medium dark green color, upright plant and excellent disease resistance.
Wyatt	 54	5.7"	Dark Green	White	3-4	BCMV(r), CTV(r) HB(r), BBS (r), XAP(r)	M	Consistent yield of dark green, shiny pods with upright plant. Excellent bacterial disease and virus resistance.
Sahara	54	5.5"	Dark Green	White	3-4	BCMV(r), BBS(r) HB(r)	M	Erect habit with pods set well above the soil surface. Good yield potential. Concentrated set.
Royal Burgundy	55	6"	Purple	Bluff	4		L	Eye catching color and great flavor. Purple pods turn green when cooked.
Momentum	56	5.75"	Dark Green	White		BCMV(r)	M	An upright bush style variety. Produces concentrated set of straight pods and is widely adapted to most growing regions. Outstanding yields.
Pike	 56	5.5"	Med Dark Green	White	3	BCMV(r), CTV(r)	M	This attractive, straight bean has an upright plant. Excellent harvest-ability and consistent performer.
Caprice	56	5.5"	Med Dark Green	White	3-5	Cl(r), Psp(r), Pss(r) BCMV(r), Xap(r)	M	A high quality straight, smooth pod with excellent yield and slow seed development on an upright plant.
Crockett	58	5.25"	Deep Green	White	2-3	R(r), CB(r), HB(r) DBS(r), CTV(r)	M	Upright plant habit that produces very uniform pods that are round and straight. Excellent disease package.
Jade	60	6.5"	Very Dark Green	White	3-4	BCMV(l), R(t), NY15(r) CTV(r)	M	Very productive with long, straight dark green pods. Upright bush holds pods above soil. Hand harvest.
Fandango (Paulista)	62	5.5-6"	Dark Green	White	3	A(r), BCVM	M	Erect plant allows for easy harvest of straight, slender beans. Excellent yield potential.

Beans (cont.)

Beans - Bush Yellow Wax

Variety	Relative Days	Pod Size	Pod Color	Seed Color	Sieve Size	Disease	U/M	Features
Rocdor	53	6"	Yellow	Dark Seeded	3-4	BCMV(t), A(t)	M	Produces high quality, long, slender pods. Early maturity with excellent yield potential. Vigorous plant. Goldrush is an attractive yellow wax with a highly concentrated set. Suited for mechanical harvest. High yielding with straight, uniform pods about two days earlier than Indy Gold with slightly smaller sieve size.
Goldrush	53	5.5"	Yellow	White	4	BCMV(r), CTV(t)	M	
Carson	56	5.5"	Yellow	White	4	BV1, NY15, A, BBS(t)	M	

Beans - Garbanzo

Variety	Relative Days	Pod Length	Color	Seed Color	U/M	Features
Sierra	Mid-Late	.75"	Tan	Tan	L	Plant is sturdy and grows to about 18" high. Outstanding yield potential.

Beans - Bush Lima

Variety	Relative Days	Pod Length	Color	Seed Color	U/M	Features
Fordhook 242	70	4-5x1"	Med Green	White	L	Popular, widely adapted bush lima. Uniform with excellent quality and yield potential.

Beans - Bush Fava/Broad

Variety	Relative Days	Pod Length	Color	Seed Color	U/M	Features
Broad Windsor	85	7"	Med Green	Green	L	5-7 flat, green beans per pod. Does best in cooler weather and should be planted in early Spring. Eat beans green or dried.

Beans - Bush Flat Pod

Variety	Relative Days	Pod Size	Pod Color	Seed Color	Disease	U/M	Features
Kentucky 125	58	6-7"	Medium Green	White		L	Bush flat pod shipping type. Low fiber with good holding ability.
Roma II	59	4-5"	Light Green	White	BCMV(l), NY15(r)	L	Standard Romano bean that is very slow to develop seed. Reduced fiber enhances eating quality.

Beans (cont.)

Beans - Horticultural						
Variety	Relative Days	Pod Length	Color	Seed Color	U/M	Features
Teggia	68	6"	Red Streaked	Buff Red	M	A bush type with improved red/buff contrasting colors at full maturity. Strong plants without runners produce 6-7" pods. Good yield potential.
French Horticultural	68	6"	Red Streaked	Red Buff Speckled	L	Long, red streaked pods are striking in appearance; has a semi-runner plant habit. Use as a green shell bean or in the dry stage.

Beans - Edible Soybeans (Edamame)						
Variety	Relative Days	Pod Length	Color	Seed Color	U/M	Features
Beer Friend	100	2-2.5"	White Pubescence	Light Green	L	Early, large podded and prolific Japanese type. Pods contain mostly 2-3 beans. High quality with good flavor. Plant height is 20".

Beans - Pole						
Variety	Relative Days	Pod Length	Color	Seed Color	U/M	Features
Blue Lake FM1K	58	6-7"	DK Green	White	L	Vigorous plant produces meaty, smooth beans. Excellent for canning or freezing.
Kentucky Wonder 65	65	7-9"	Green	Brown	L	Hardy plant the is very prolific and widely adapted. One of the most widely used varieties.

Beets

Beets - Hybrid Beets							
Variety	Relative Days	Root Shape	Root Color	Top Height	Top Color	Disease	U/M Features
Boldor	51	Round	Golden	Med	Green		M Boldor has good vigor and exceptional golden color. Great quality makes this an excellent fresh market beet.
Red Ace	53	Smooth Globe	Dark Red	Short 12-13"	Bright Green	DM(t), CLS, DH, BH	M Very popular variety. It is noted for its uniform early maturity, heavy yields and consistent interior color.
Zeppo	53-55	Round Globe	Dark Red	Upright	Glossy Green		M Fast growing, smooth, round with expression of taproot. Long and strong foliage. Multiterm. Red color with expression of white rings.
Carillon RZ	60	Long Cigar	Deep Red	Short 12-14"	Bright Green		M Long rooted cylindrical red beet with good internal color which is ideal for slicing and pickling. Strong upright foliage with high yield.
Moneta	60	Round	Deep Red	Short 12-14"	Bright Green		M Monogerm beet for precision seeding. Uniform round roots with deep red interior color.

L - sold per pound M - sold per thousand  - Logan-Zenner favorites

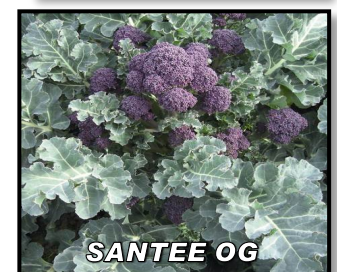

Beets (Cont.)

Beets - Open Pollinated								
Variety	Relative Days	Root Shape	Root Color	Top Height	Top Color	Disease	U/M	Features
Chioggia Guardsmark	52	Globe	Bi-Color	Med.	Green		M	A beautiful bi-colored, scarlet red, garden beet with interior rings of reddish-pink and white.
Detroit Supreme	59	Smooth Globe	Dark Red	Med.	Green	DM(t), BH	L	Detroit Supreme offers a high color, smooth skinned root with refined crown and tap roots. Consistent interior color.
Touchstone Gold	60	Globe	Golden Orange	Med.	Green		M	Roots are uniform shaped and very smooth with a sweet mellow flavor. Green tops with light golden petioles.

Broccoli

Broccoli - Hybrid								
Variety	Relative Days	Plant Height	Head Type	Bead Size	Color	Disease	U/M	Features
Green Magic	90	Med.	Semi Domed	Small	Blue-Green	DM(t)	M	Good uniformity and holding ability. An adaptable variety for fresh market & processing.
Lieutenant	Early	Med.	High Dome	Fine-Med	Med-Dark		M	Ideal choice for growers looking for a variety that will reliably produce high quality crowns with excellent shape that performs well in warm growing conditions.
Emerald Crown	93	Compact	Semi Domed	Small	Blue-Green		M	Excellent quality crown cuts/short trim product in NAFTA regions. High resistance to purpling.
Arcadia	95	Tall	High Dome	Small	Med. Green		M	Widely adapted hybrid. Good resistance to hollow stem. Fresh market or processing.
Emerald Pride	97	Med.	Semi Domed	Fine	Dark Green	DM(t)	M	Summer type for bunching and processing with medium branching. Good heat tolerance.
Marathon	97	Med-Tall	Dome	Small	Blue-Green		M	Highly adaptable with high dome, small bead and heavy head. Sizes well in cold.

Broccoli (Cont.)

Broccoli - Purple Sprouting *Seed available Untreated only*

Variety	Relative Days	Head Size	Color	Plant Height	U/M	Features
Santee OG	80-115	Large	Purple	Upright	M	Incredibly productive with sweet and tender green stems. Fall or winter crops.
Red Fire	Main	Medium to Large	Purple	Tall	M	Overwinter type. The heads are easy to pick, medium to large size with a dark purple color.
Mendocino	190	Broccolini Spears	Purple	Upright	M	Overwinter type. Good Cold tolerance with high yields. Upright plant with an abundance of beautiful purple spears.

Broccoli - Raab (Rapini)

Variety	Relative Days	Color	U/M	Features
Zamboni	60	Blue-Green	L	A slow maturing high quality raab with uniform flowering. Tall with blue-green leaf color. Harvest early Spring to Summer.

ZAMBONI

Brussels Sprouts

Hybrid Brussels Sprouts

Variety	Relative Days (TP)	Plant Habit	Sprout Type	U/M	Features
Confidant	Early	Medium Large	Round Deep Green	M	Very early maturing with heavy sets of firm, well shaped, round, high quality sprouts for fresh market.
Franklin	100	Tall	Round Green	M	One of the earliest, high-quality varieties available. Heavy yields of uniform, firm sprouts.
Cronus CRR	Early-Mid	Medium	Round Green	M	Sturdy plant with smooth, good quality buttons that have a small butt.

Cabbage

Cabbage - Fresh Market Green

Variety	Relative Days	Color Size	Head Type	U/M	Disease	Features
Fast Vantage	60	Medium Green 2.75 lbs	Round	M		Uniform variety that performs well in early, cool season slot.
Farao	62	Medium Green 3-3.5 lbs	Round	M	TB(t), T(t)	Sweet, dense head; short core. Good field holding. Reliable variety for early fresh market.
Crystal Vantage	65	Green 3-4 lbs	Round	M	Foc(hr)1	Crystal Vantage is easy to grow, early to mature with good head size and disease resistance.
Artost	67	Blue-Green 3-.5 lbs	Round	M	FY(r), TB(t)	Attractive, uniform heads with good field holding ability.
Charmant	72	Blue-Green 2.5 lbs	Round	M	TB(r), FY(r), BR(t)	Blue-green color and solid round, uniform heads. Tight internal structure with a short core. Widely adapted.
Xtreme Vantage	75	Blue Green	Round	M	Foc(hr)1 Xcc (ir)	Xtreme Vantage is a new cabbage variety from Sakata showing very good uniformity in the field.
Kilagreg CRR	75-80	Medium Green 3-5 lbs	Round	M	CR(hr)	Early to main season cabbage with high yield and good size. Kilagreg offers peace of mind for growers with club root issues.
Expat	88	Blue-Green 3-6 lbs	Round	M	Foc(hr), TB(hr)	The same great look and yield as Ramada. Large head with a strong plant for better yield in challenging climates.
Vantage Point	95	Blue-Green 5.5 lbs	Round	M	TB(t), FY(r)1, BS(t) BR(t)	Mid-late season maturity. Large dense heads and a well filled interior makes this variety suited for long distance shipping.
Tekila CRR	95	Blue-Green 5-6 lbs	Round	M	CR(hr) Foc(hr)1	High resistance to Club Root and Fusarium. Good field storage with good quality dense heads. Medium core and good wrapper leaves.

Cabbage - Fresh Market Red

Variety	Relative Days	Color Size	Head Type	U/M	Disease	Features
Red Dynasty	70	Deep Red 3-4 lbs	Round To Oval	M	TB(t), BR(t)	Good uniformity of size and shape. Intermediate black rot resistance. Holds well. Good internal color.
Primero	72	Deep Red 2-3 lbs	Round	M	BL(t), TB(t)	Good early northern variety with smooth, firm, medium size heads. Suited to close spacing; holds well.
Ruby Perfection	80	Deep Red 3-4 lbs	Round	M		Large framed, vigorous, uniform plant that holds well without bursting.

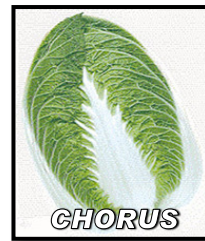

Cabbage - Processing

Variety	Relative Days	Color Size	Head Type	U/M	Disease	Features
Krautman	78	Green Very Large	Round	M	TB(t)	Medium to large frame produces round, well wrapped, high density head. Suitable for Mechanical harvest. Medium dry matter.
Kaitlin	94	Green Very Large	Round	M	FY(r), TB(t)	Vigorous, dense heads with short cores. Excellent field holding for kraut/slaw. Cuts well mechanically.

Cabbage (Cont.)

Cabbage - Storage

Variety	Relative Days	Color Size	Head Type	U/M	Disease	Features
Bartolo	115	Dark Green 4-8 lbs	Round	M	BS(t), TB(t)	A proven high yielder developed for long term storage and processing. Dense structure with short core. Very good holding ability.

Cabbage - Savoy

Variety	Relative Days	Color Size	Head Type	U/M	Disease	Features
Savoy Ace	80	Deep Green	Semi-Globe	M		AAS winner. A medium large, finely savoyed variety with excellent flavor. This variety has good field holding ability and wide adaptability.
Wirosa	110	Deep Green	Round	M	TB(t)	Frost tolerant solid heads ideal for late fresh market. Stores up to six months.

Cabbage - Chinese

Variety	Relative Days	Color Size	Head Type	U/M	Disease	Features
Blues	57	Medium Green 4-4.5 lbs	Barrel Shaped	M	SR(t), DM(t)	Spring through early Winter variety that is extra slow to bolt. Very vigorous variety. Well adapted to the Northwest.
Chorus	65	Bright Green 5 lbs	Barrel Shaped	M	CR(t), DM(t), SR (t)	Fall to early Winter variety. Avoid dry conditions at heading stage. Semi-upright plants.
Panda 	65-70	Dark Green 4-6 lbs	Cylinder	M	BS(t), CR(r)	Slow bolting and heat tolerant. Strong Club Root resistance. Bright yellow interior color and excellent quality.
China Gold	75	Bright Green 4-5 lbs	Barrel Shaped	M	TB(t), CR(t)	A new Sakata variety with excellent internal and external color. China Gold has a compact frame and is slow to bolt.

Pak Choi

Pak Choi

Variety	Relative Days	Plant Habit	U/M	Head Characteristics	Features
Mei Qing Choi	35-40	Erect, Compact	M	Green petiole, Tight vase-like shape	First hybrid, green stem dwarf Shanghai Pak Choi type with good heat tolerance and a dark leaf color. Good uniformity. Good bolt resistance.
Joi Choi 	50-55	Semi-Erect	M	Bright green leaves	Slow bolting, with excellent uniformity. Widely adaptable. White petioles can get large.

Carrots

Carrots - Hybrid Nantes Types

Variety	Relative Days	Root Size	Shape	Tops	U/M	Use	Features
Mokum	56	6x.75"	Cylindrical Slight Taper	9"	M	Bunching, Finger Carrot	Very high colored. Almost coreless. A sweet, early bunching carrot with early color development. Excellent local market.
Goldfinger	 Early	5-6x1"	Cylindrical Blunt	12"	M	Bunching	Very uniform root with sweet flavor. Attractive deep orange color. Strong upright top and bolt tolerant. High yield recovery.
Baltimore	Early	10x2"	Cylindrical	14"	M	Cut-n-Peel	The vitamin A rich, deep orange roots stay mild and sweet with a juicy crunch. Ideal for soups, stews, roasting and juicing.

Carrots - Hybrid Cello/Jumbo Types

Variety	Relative Days	Root Size	Shape	Tops	U/M	Use	Features
Enterprise	Main Season	10-12"	Cylindrical Blunt	Very Strong	M	Cello Slicer	Widely adaptable. Very smooth with deep orange color and great taste. Tolerance to Alternaria Leaf Blight.
Olympus	120	7-8"	Tapered	15-17"	M	Cello, Jumbo & Bunching	Uniform shape, great color and a smooth finish. Taste is outstanding with a crisp texture. Yield potential is high with this classy carrot.

Carrots - Hybrid Colored

Variety	Relative Days	Root Size	Shape	Tops	U/M	Use	Features
White Satin - NT	65	8"	Cylindrical Blunt Tip	14"	M	Specialty	Great quality of shape, yield and flavor in one package! Very crisp, very sweet carrot for early harvest.
Yellowstone - NT	70	9-10"	Cylindrical	14-16"	M	Specialty	Vigorous, widely adaptable variety that can grow up to 9-10" in length.
Rainbow - NT	70	7-8"	Cylindrical	14"	M	Specialty	Truly unique hybrid-a single variety; not a blend of seed. Each color offers a distinctive flavor- all have high sugar content.
Purple Haze - NT	95	7-8"	Cylindrical Taper	14"	M	Specialty, Juice or Dye	Unique buncher & juicer. Attractive purple carrot with shocking orange center. Plant a bit later than normal to avoid bolting. ASA Winner!
Deep Purple F1 - NT	125	12-14" x 1-1 3/4"	Tapered	17-20"	M	Specialty, Juice or Dye	Attractive purpling at top attachments. Vigorous tops with uniform roots and a dark purple exterior.

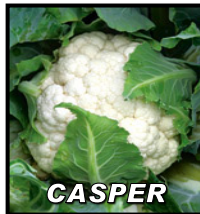

Cauliflower

Cauliflower - Hybrid

Variety	Relative Days	Head shape	Plant Type	Self Wrapping	U/M	Features
Cheddar (Specialty)	67	Dense Dome	Medium Erect	Good	M	An early maturing specialty variety with attractive orange curds. This will make an attractive addition to Graffiti for use in salad bars.
Casper	Early Main	High Dome	Vigorous Erect	Excellent	M	Small frame with a bright white head that weighs well. Excellent wrap helps Casper perform in warm and dry conditions.
Vitaverde	71	Dome	Erect		M	Big, heavy green heads. For both cool and warm production. Famous cross of broccoli and cauliflower with a mild sweet taste.
Artica	75	Dense Dome	Medium Large	Good	M	Uniform maturity, bright white head color with heavy, dense curds. Good head protection.
Graffiti (Specialty)	75-80	Dense Dome	Vigorous Erect	Good	M	Deep purple curd color. Excellent for salad bars. Curd changes color when boiled. Antioxidants are 7-10 times greater than normal cauliflower.
Bishop	76	High Dome	Vigorous Erect	Excellent	M	Good summer variety that holds color well. Very bright white with a good wrap. Heavy head makes for great yields.
Absolute	85-90	Dense Dome	Medium	Excellent	M	A good choice for main season fresh market. Heads are dense with very white curd and excellent uniformity. Excellent wrapper leaves.

CHEDDAR

CASPER

ARTICA

GRAFFITI

Cauliflower - Hybrid Romanesco

Variety	Relative Days	Head Size	U/M	Features
26-701 NEW	75-78	High Dome	M	Vigorous Romanesco hybrid. Very healthy plant has high dark green medium curd with good quality in spring, summer and autumn. Especially the curd quality in spring and summer makes this a unique variety.

BISHOP

26-701

PICASSO

Cauliflower - Hybrid Fall/Overwinter Types

Variety	Relative Days	Options	Head Shape	Plant Type	U/M	Self Wrapping	Features
Belot	135-140	Organic	Dome	Large	M	Good	Mid-July planting for late December / early January harvest.
Picasso	245	Non-Treated	Dome	Large	M	Good	Mid-July planting for an early April harvest.

TZ 6200

BALADA

Celery

Celery

Variety	Relative Days	Color	Plant Height	Stock Length	U/M	Features
TZ 6200	100	Standard Green	18"	9.5"	M	TZ 6200 has excellent uniformity and produces long petioles and heavy sticks. Fusarium resistant.
Balada	100	Green	Tall to very tall	Long	M	Tall processing and fresh market celery, with intermediate tolerance to Fusarium. Tall and heavy compact plants. Good field holding ability.

Collards

Collards						
Variety	Relative Days	Plant Type	Leaf Color	Leaf Type	U/M	Features
Vates	78	Upright	Green	Large Smooth	L	Upright, productive and long standing. Cold hardy and slow to bolt.

Sweet Corn

TripleSweet™ and **Synergistic** varieties are a new class of sweet corn that have 75% sugary enhanced (se) kernels and 25% supersweet kernels. The result of this genetic combination is extended shelf life over traditional se varieties and exceptional eating quality. These varieties are for local markets and roadside stands. They are widely adapted with excellent results in Western U.S. and Canada. Isolation requirements are the same as those required for sugar enhanced varieties. Yellow, bicolor and white.

Yellow Sugar Enhanced Hybrids							
Variety	Relative Days	Plant Height	Ear Height	Ear Size	Row Count	Disease	U/M Features
Bodacious Homozygous	75	7.25 ft	20"	8x1.8"	16	R(t), SW(t)	L Excellent eating quality and holding ability. Widely adapted with consistent performance.
Honey Select Triple Sweet™	79	6.5-7 ft	28"	8.5x2"	18-20	IR:Pst	M AAS Winner! Honey Select is noted for producing large refined ears. Superb eating quality.

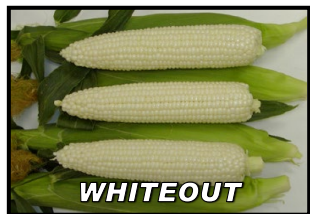

Bi-Color Sugar Enhanced Hybrids							
Variety	Relative Days	Plant Height	Ear Height	Ear Size	Row Count	Disease	U/M Features
Sweetness Synergistic	68	6 ft	18"	8"	16		M The excellent emergence and vigor that produces a sturdy plant. Good tender and flavor with excellent protection.
Profit Synergistic	70	7 ft	23"	8"	14-16	CR(ir), SW(ir), NCL(ir)	M Large early season ear with excellent husk protection, attractive flags and good tip fill.
Bon Appetit TSW Homozygous	71	6.5 ft	17"	7.75"	16-18		M Large blunt ears on a nice plant. Excellent eating quality and husk package.
Temptation Herterozygous	72	6 ft	16"	7.5"	16-18		M Good cold soil vigor, great husk cover and tip fill. High yield potential.
Temptation II Performance Series	72	6 ft	16-18"	7.5-8"	16-18		M Biotech bi-color SE sweet corn, Round-Up ready variety. Reduced pesticide variety.
Luscious Herterozygous	75	6-7 ft	15"	8"	16-18	Et(ir), Ps(ir), Pst (ir)	M An attractive 8" blunt-shaped ears with sweet, tender quality. Bi-color kernels that fill well, even under stressful conditions.
Providence Triple Sweet™	82	6.5 ft	26"	8.5x1.85"	14-18	R(Rp 1-d)	M Large, slightly tapered ears with superb eating quality. Suited for roadside stands and local markets.
BC 0805 Triple Sweet™ (Attribute)	82	6.5 ft	26"	8.5x1.95"	14-16	R(Rp 1-d)	M Insect - Protected Variety! The first Attribute insect protected TripleSweet™ variety. Outstanding eating quality. Requires a signed stewardship agreement.

Sweet Corn (Cont.)

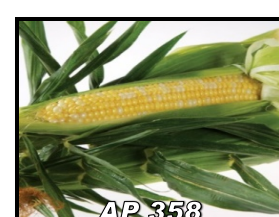

White Sugar Enhanced Hybrids

Variety	Relative Days	Plant Height	Ear Height	Ear Size	Row Count	Disease	U/ M	Features
Whiteout Homozygous 	73	6.5 ft	16"	8"	16		M	Very good eating quality. Sturdy, vigorous plant, classy package with great ear conformation. Excellent flavor.
Misquamicut	78	6.5 ft	16"	8.5"	16-18	Et(ir), Pst(ir)	M	Misquamicut sweet corn yields superb eating quality. The ears are easy to snap off the 6-1/2' clean and sturdy plants. Cylindrical ears are filled well to the tip of shiny white kernels.
WH 0809 Triple Sweet™ (Attribute)	80	6.5 ft	22-26"	8.5x1.95"	16	SCLB(r), R(r)	M	Insect - Protected Variety! Similar to Avalon with better field holding. Exceptional eating quality. Requires a signed stewardship agreement.

Yellow Super Sweet Hybrids

Variety	Relative Days	Plant Height	Ear Height	Ear Size	Row Count	Disease	U/ M	Features
Takeoff	69	6 ft	28"	7.5-8.5"	16-18	NCLB	M	Excellent seedling vigor, superior eating quality for early. Excellent ear size and high row count.
XTH 1273	72	5-6 ft	24"	7-8"	16-18	NCLB(ms) HPPD(t), ALS(t)	M	Yellow hybrid with incredible eating quality. Great ear size and yield make a perfect fit for midseason roadside and shipping markets.
XTH 1572	72	5-6 ft	20"	7-8"	16-18	NCLB(ms) HPPD(t), ALS(l)	M	Has terrific eating quality paired with a dark husk package and excellent flag leaves. An exceptional variety for both shipping and roadside markets.
Vision MXR Augmented	75	6 ft	20"	8x1.9"	16-18		M	Eating quality of this variety is exceptional. Large ears with good tip fill. Good emergence and early vigor.
Accession MultiSweet 	78	6.5 ft	26"	8x1.9"	16-18	NCLB	M	Large ear with excellent tip fill and husk cover. Accession has performed very well throughout the Northwest.
Passion II 	81	Medium	28"	8x1.7"	18-20	HR:Ps\Rp1D IR:Et\Ps	M	Biotech yellow SH2 sweet corn, Round-Up ready variety. Reduced pesticide.
SS Jubilee	83	6.5-7 ft	28"	8.5x1.8"	16-20		M	Exceptional qualities. Refined sweet flavor, smooth texture and tender pericarp.

Sweet Corn (Cont.)

Bi-Color Super Sweet Hybrids								
Variety	Relative Days	Plant Height	Ear Height	Ear Size	Row Count	Disease	U/ M	Features
Kickoff	69	6 ft	28"	7.75-8"	16-18	PS/RpG, NCLB	M	Excellent seedling vigor, superior eating quality for first early. Excellent ear size and high row count. Great husk protection and package.
