Frequent Asked Question

Because our Banner Stretching System is still new for some of you, we often have a question about the stretching quality.

Q: Is the stretch still drum-like for large banners?

YES, and our best answer is to show our clients' realizations.

As you can see these two large printed vinyl frames are really well tighten.

You can obtain the same results for your clients with our simple, cost-effective, and easy to change banner stretching system.

These frames were fabricated using our light and cost-effective TS23 extrusion.

These large banners (68' x 44') were printed and installed by OaiCorp.com at the Amelia Arena in Tampa, FL.

The frames were fabricated using our light [TS23 extrusion](#).

Other Examples of Perfect Stretching that your Clients can benefit from.

124' x 10' frame realized with the [TS23 extrusion](#)

Huge vinyl mesh building wrap (over 17,000 sq. ft) that encloses 5 levels of an exposed parking garage of a residential building in Baltimore, MD. Realized with our [TS44 extrusion](#).
