

THE MEASURE OF CHRIST

PATTERN OF THE COSMIC THRONE ARK OF THE COVENANT

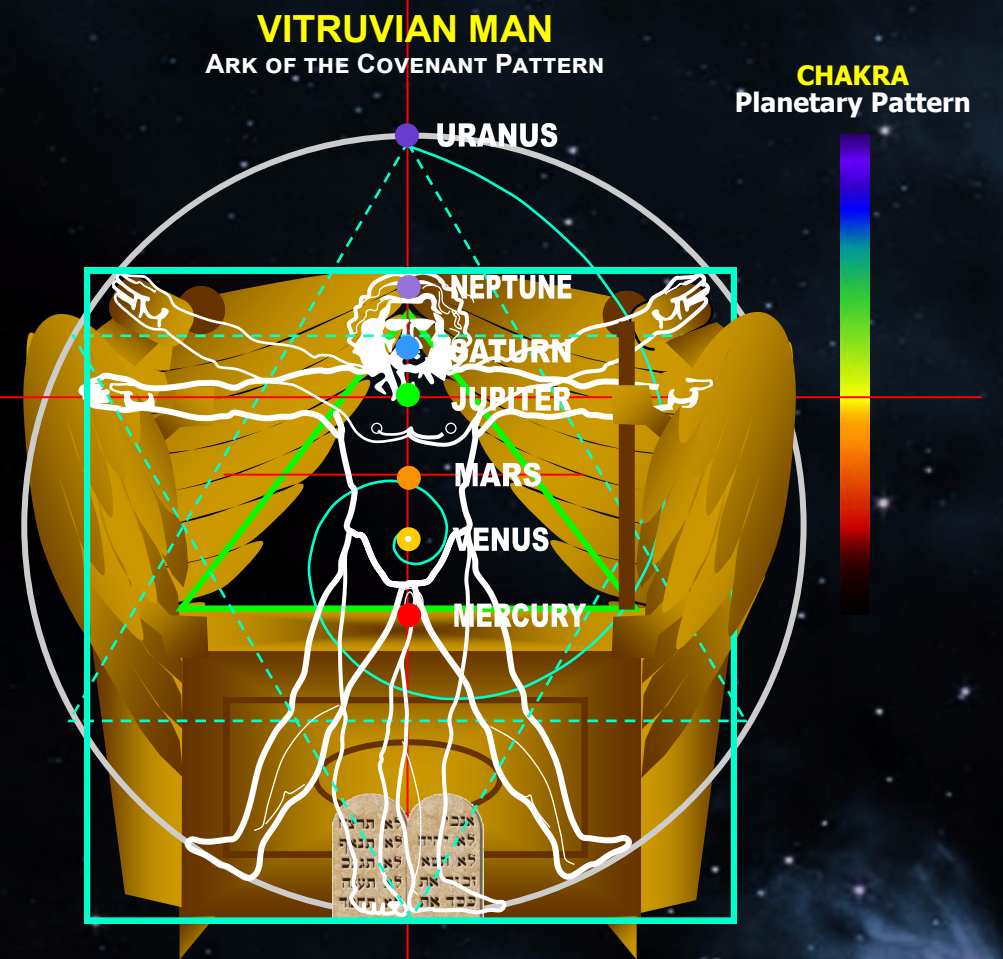

The purpose of this illustration is to suggest that the Solar System is construed to that of the proportions of the human body form. Moreover, it is stipulated that the male body form is the 'Universal Template' from which all created things and begins are patterned after. Supremely, this 'male body form' is that of 'Christ'. This is not in regards to the New Age notion of the 'Universal Christ' or 'Christ Consciousness' but that of GOD the SON, who to one a human male body form and become mortal to redeem the fallen race of Adam and Eve. Such humans were special out of all other created beings in that humans were made in the 'likeness and image' of the Creator, YHWH. Nonetheless, if one superimposes the male human body form as in the Vitruvian Man, it would appear that the various planets in the Solar System correspond to specific nodes in the male human Chakra Points of the body. The Planets also follow the color light spectrum of frequency and resonance that does also appear to match their color scheme in general. This would stand to reason as the Bible depicts a rainbow that encircle the Throne of YHWH. This study also suggests that if one superimposes the Ark of the Covenant patten with such a 'body form' and planets of the Solar System, a very interesting correlation occurs. The feet of the 'Vitruvian Man' span the approximate length of the Ark 'box' in terms of length. The 'Chakra Points' would commence at the Mercy Seat. A 'Square' and 'Circle' encompasses the Vitruvian Man pattern composes the entire Ark of the Covenant. The hand expanses appear to correlated to the 'head' of the 2 corresponding Cherub on each side.

Ark of the Covenant in Heaven
THRONE OF YHWH

The study also considered the notion of a celestial 'Ark of the Covenant' pattern if one superimposed the constellation of Orion. It is such that Orion is considered the 'Christ' Redeemer and Guardian of the Galaxy, etc. Likewise, the human proportion of the 'Body Form' are amazingly correspondent to the length of the Ark 'box' to the expanse of the Cherub's wings that are thus in phi ratio. Was is also very interesting is that the exquisite alignment of the Orion Belt Stars converse at the border where the Mercy Seat is fixed. Also the corresponding spot of where the Orion Nebula would be situated is directly dead-center of the Ark box from a front view perspective.

The Ark of the Covenant is a mirror of the microcosm of YHWH. One can ask, what does 'GOD' look like how can He be described? With such mathematical notions and patterns, one can truly say that 'GOD is like the phi ratio'. He thus can be determined to this extent of a dimension and proportion. 'GOD' is like the Fibonacci Sequence of numbers. 'GOD' is mathematics. As all this created is a reflection of the Glory of YHWH, it would stand to reason that the 'Signature of YHWH' can thus be found as the common thread 'blueprint' that carries this divine proportion.
