

HAARP WEATHER WARFARE

THE HIGH FREQUENCY ACTIVE AURORAL RESEARCH PROGRAM

HAARP is a series of radio antennas in a geometric configuration that emits high powered radio waves into the sky at the MegaHertz level. Energies atmosphere with high frequencies, using radio waves to heat up the atmosphere and deflect it back down to earth. This technology could be used as a Weather Weapon to direct electro-magnetic waves into enemy positions, strongholds or armies. It is estimated that HAARP waves occur at the 750k Watt level. This is not to be confused with the weather 'ring' seen on Radar that are produced by local stations for that very purpose but use the same principles as HAARP to alter and direct weather.

Other areas of weather modification is currently being developed for weapons purposes using lasers that concentrate direct energy to a single beam. These lasers require billions of Watts of energy. How this functions is that the lasers target electrons in the atmosphere that loosens ions to create condensation of moisture, as in rain, lightning or earthquakes even. It has been reported that in some instances HAARP can manipulate weather to the point of creating Plasma is what perhaps is used as a sort of in-between conduit between the physical and the spiritual dimensions. This could be the very material that when energized at certain points and times, could lead to the opening up of the 'vortexes' or portals in the spiritual dimensions that can provide access to time travel even.

Perhaps such knowledge is what will occur in the Bible describe in the Book of Revelation that the AntiChrist will cause 'Fire' to come down from the sky. In scientific terms, it is just a energizing of the molecules to such a degree of energy required that it strips the atmosphere of its electrons and condenses the ions to form lightning. In theory, it is possible and it has been replicated in science labs but the mechanics is decades in the works. Such entities like the Fallen Angels and the AntiChrist will have this knowledge and ability on the spot as part of what the Bible calls his 'lying wonders'. That will be used to sway and deceive the world into his following. Vortexes form in stirred fluids, including liquids, gases, and plasmas. Some common examples are smoke rings, the whirlpools often seen in the wake of boats and paddles, and the winds surrounding hurricanes, tornadoes and dust devils. Vortexes form in the wake of airplanes and are prominent features of Jupiter's atmosphere.

AUSTRALIA TOWER ZERO

Harold Holt Naval Communication Station

RADIO TOWERS

The design is exactly the same as the 'Stargates' of ancient places like Ur, Babylon and Rome.

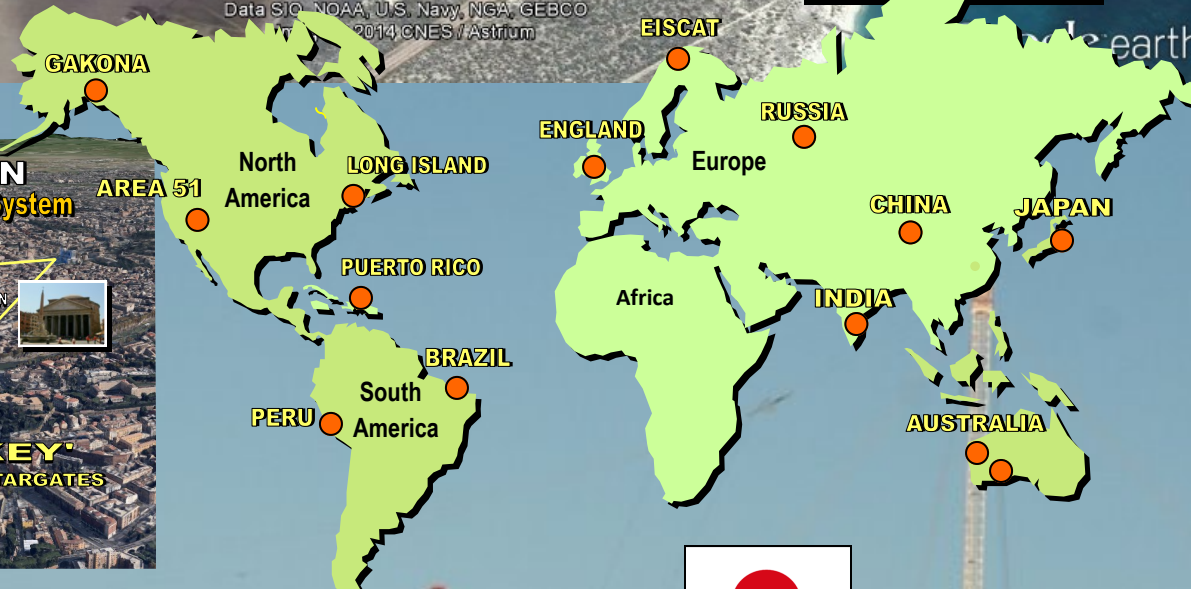

CELESTIAL VORTEXES

In 2 Kings 2:11 Chariots of fire separated and took Elijah up by a whirlwind (vortex) into heaven. And in Judges 13:20 when the flame went up toward heaven from the altar, the angel of the Lord went up in the flame of the altar.

HAARP world - wide stations

The hexagram configuration also matches certain avenues of Rome and end-points where prominent government buildings or where ancient Roman structures once stood. The Obelisks are made of granite that have quartz or minerals. In essence they are functioning as antennas or receivers like a modern HAARP. They resonate frequency and energy, perhaps to a Star-Gate? This is why the Pantheon is round as is the Vatican quad and Popolo plaza.

HAARP is a target of conspiracy theorists, who claim that it is capable of modifying weather, disabling satellites and exerting mind control over people, and that it is being used as a weapon against terrorists. Such theorists have blamed the program for causing earthquakes, droughts, storms and floods, diseases, etc.

A vortex is a region where the flow is mostly a spinning motion about an imaginary axis, straight or curved. That motion pattern is called a vortical flow.

Once formed, vortexes can move, stretch, twist, and interact in complex ways. A moving vortex carries with it some angular and linear momentum, energy, and mass. In a stationary vortex, the streamlines and pathlines are closed. In a moving or evolving vortex the streamlines and pathlines are usually spirals.

HAARP is an ionospheric research program done with high-power radio frequency transmitter facility operating in the high frequency (HF) band. Frequency is used to temporarily excite a limited area of the ionosphere. In some cases, this effect produces a particular layout is in the Sacred Geometric pattern.

The HAARP project directs a 3.6 MW signal, in the 2.8–10 MHz region of the HF (high-frequency) band, into the ionosphere. The signal may be pulsed or continuous.
