### BHC PACKS MONDAY'S WISDOM

Day Two (Genesis 1:6-8)

## Be Thankful for the Barriers that Protect Our Lives!

*All acts of creation after the creation of Light would have been impossible without the Barrier the Creator made on Day Two, yet the importance of barriers isn't understood by many people today.*

**Connect With The Bible's Wisdom of the Beginnings Every Day!**

On Sunday the **elohiyim** created **Light** and on Monday It created a **RAQIYA** – a **Barrier**. All acts of creation after Light would have been impossible without that Barrier. It will protect all forms of life, and everything else that the elohiyim brings into being on Days Three, Five, and Six. *After the creation was finished, if that Barrier was removed, the entire creation would collapse.*

As a result of science, we know for a fact that the “**Sky**” above us is not “**a solid dome-like structure**.” There is no huge body of water above it. But science also discovered there is a **thin atmospheric layer** that surrounds the Earth. *Without it all life on Earth would cease.*

There are many different types of barriers that affect our lives. Some are the **shelters** we live in, **clothes** we wear, **fences** and **walls**. There are other barriers like **laws** that protect us from doing harmful things to others and from them doing harmful things to us. In addition, there are **chemical barriers** like **vaccines** that protect us from diseases. Barriers also create “**safe environments**” that **make it possible for other things to be done, made and created**.

In the first story in *Genesis*, the **RAQIYA** is the key factor for creating “**the order of the creation**,” and “**order is a defining characteristic of this elohiyim and its reputation**.”
