

JUNIE

Junie is a nine year old red smooth coat dachshund. She has IVDD and has been paralyzed for about five years. Junie underwent stem cell therapy last year and was evaluated for laser therapy and physical therapy, but was not a candidate. She has some movement in her back legs and occasionally wobble walks, but usually scoots around the house. Junie has a custom fit cart from Eddie's Wheels. Due to her paralysis, Junie has bladder and bowel incontinence and needs to have her bladder manually expressed several times a day. She also wears doggie diapers to prevent leakage. Junie is as sweet and loving and friendly as the day is long. She loves everybody, including children, other dogs and would probably do fine with cats, although she has not been around them in her foster homes. Junie loves car rides and occasionally plays with a toy or goes outside to enjoy the sun. She is crate trained, but prefers to sleep with her person. Junie loves her person and wants to be with them all the time. She does not like to be alone. Junie needs a home where someone is home more than gone. Mostly, she needs someone to love her and provide the special care she needs. Junie will reward that person with a lifetime of love and companionship.
