

Cyber Security

SOLUTIONS

n-Link's cyber security services include information assurance (IA), risk management, critical infrastructure protection (CIP) facility protection planning, application security, information systems security, certification and accreditation (C&A), incident response planning and execution, exercises, FISMA implementation support, records management PKI, identity management, and more.

n-Link provides comprehensive CIP & IA services for federal and commercial customers using numerous approaches and methodologies.

CAPABILITIES

Critical Security Services

- ✓ n-Link specializes in CIP, IA, application security, C&A, and risk management using a team of industry-leading experts to continuously analyze, assess, and report on critical systems
- ✓ n-Link's security engineers design, test, implement, and manage vital key networks impacting daily U.S. Government operations
- ✓ n-link performs critical infrastructure asset identification and provides ongoing monitoring and management

CUSTOMERS

Department of Commerce

n-Link supports the Department of Commerce (DOC) OCIO IT assets and operations including secure server enclaves for each of the DOC operating units and VLANS. We also provide programming, configuring, testing, maintenance, and documentation of firewalls, routers, and the intrusion detection system.

Commercial Customers

n-Link is responsible for ensuring the security of data, systems, and applications within intelligence centers that collect, analyze, and protect information across multiple locations.

CASE STUDY

n-Link developed the National System Security Cyber Security program policy, System Security Plan (SSP) and their Plan of Action and Milestone. Our team completed online encryption (TACLANE) installs & upgrades to 1Gigabyte units. n-Link was instrumental in acquisition of the Fire Eye software suite used to assist with intrusion detection monitoring and malware analysis throughout DOC and its 13 bureaus.
