PROJECT TIMELINE:

OUR ROLE:
Prime Consultant

PROJECT TYPE: Commercial Development

PROJECT DESCRIPTION:

Scheffer Andrew Ltd. has provided civil engineering services on numerous commercial retail sites throughout Alberta. Larger sites typically consist of big box anchor tenants (such as Sobeys’s, Wal-Mart, Canadian Tire, Safeway, and others) and a number of smaller CRU buildings, developed in a staged fashion. Our work includes assistance with planning, preliminary engineering analysis, traffic impact assessments, stormwater management modeling, and detailed design of site servicing and site grading/surface drainage.

Projects often incorporate significant offsite improvements, for which we can provide a full spectrum of civil engineering design and construction management services. Past projects have included construction of arterial roadways and signalized intersections, watermain extensions, sanitary trunks and lift stations, storm sewer trunks, and stormwater management wetlands.

To date, we have designed shopping centres of varying sizes in Edmonton, Fort Saskatchewan, Cold Lake, St. Paul, Medicine Hat, Calgary, Slave Lake, Okotoks, Airdrie, and Swift Current.
