

DESCRIPTION

ENVIROSOL contains no petroleum distillates, organic halides or any other hazardous ingredients or unsafe chemicals per OSHA Regulations (24 CFR, SEC 1900, 1200).

ENVIROSOL dissolves grease, tar, mastic, concrete cures, form release oils, and dirt from concrete, marble and other surfaces without generating noxious fumes. It is biodegradable and safe to work with.

ENVIROSOL liquefies flooring mastics during asbestos tile removal and dissolves all asbestos containing mastics during asbestos abatement projects.

ENVIROSOL easily removes stubborn tile and carpeting from sub-floors by penetrating through the seams to the adhesives. It removes E.I.F.S. and other synthetic products without harming the surface.

ENVIROSOL safely removes silicone caulking, adhesives, decals, chewing gum, printing inks and below grade waterproofing from all hard and porous surfaces.

ADVANTAGES

- No Harmful or Hazardous Ingredients
- Biodegradable
- Versatile Cleaner & Remover
- Pleasant Aroma
- Environmentally Friendly
- Estimated Coverage Rate Per Gallon - 200-400 sf

FOR USE BY

- General Contractors
- Roofing & Asphalt Contractors
- Asbestos Abatement Contractors
- E.I.F.S. Applicators
- Fuel Oil Companies
- Road & Highway Departments
- Waterproof Contractors
- Equipment Rental Companies
- Spray Equipment manufacturers
