

E&B OILFIELD SERVICES INC. HAZARD IDENTIFICATION PLAN

The Hazard Identification sheets contained in this binder are the result of a collaborative effort among all E&B employees and Supervisors. These sheets will be helpful in training and JSA preparation. This binder helps identify the hazards that employees may encounter through the work day. If employees encounter current types of work that are not covered in this binder or supervisors acquire new types of work, information needs to be forwarded to the safety department to be added to this binder. This binder is intended to be a comprehensive but not all inclusive list of the dangers that may be encountered.
