

Join us for a tour of the Baumschultechnik where you will see the newest in nursery automation demonstrated in one location.

The "Baumschultechnik", the leading trade fair for technology in the nursery industry, is co-organized and organized by BTB GmbH every 5-7 years. With about 300 exhibitors, "Baumschultechnik" is the largest technical exhibition for tree nurseries in Europe. In addition to classic trade fair stands, machines will be presented during the two-day exhibition on specially planted demonstration grounds in the real working process. At each fair, a detailed catalog is set up on the level of a textbook. It provides information on about 2000 products, such as vehicles, machinery and equipment for nurseries. The catalog is supplemented by the online reference work **www.baumschultechnik.de** on the Internet.

Show Dates and Location

August 29th and 30th, 2019

(Thursday + Friday)

Horticulture Centre, Ellerhoop, Germany

25 km north-west of Hamburg
