

## Preparation Checklist

Please Help us avoid set-up delays and potential problems by checking the following items before we arrive:

- Please have driveway clear of cars and other obstacles before we get there, *as well as when we come back to pick up.*
- Please be sure that someone is present at the time of delivery to show our delivery team where to set up and make payment.
- Make sure a clear path of at least 3 feet wide is available for delivery to set-up spot.
- Your spot should be an open lawn area with enough clearance from tree branches and other obstructions.
- If you are not renting a gas-powered generator *the source of power must be no more than 100 feet away*. If you are renting more than one item, multiple circuits may be required so as not to overload any one circuit. Please check all outlets to be sure they are working and have additional circuits identified in case we need them.
- Our equipment is very heavy ranging from 200-500 pounds. *Please choose a set-up location that is easily accessible from your driveway or street, not requiring severe slopes, steps or stairs to access.* The setup site should be relatively level.
- We will not setup the inflatable under or near any power or utility wires. Also the inflatable cannot be placed near any swimming pool or body of water.
- We use 18-inch ground stakes to secure our inflatables. Please make sure there are no underground sprinklers, or buried electrical/utility wires in close proximity of the setup spot. *The customer is responsible to mark all sprinkler lines and underground wires. CT Bounce House LLC is not liable for damage to underground sprinklers or utility lines.*
- Clear the site of all sharp sticks, animal waste, large rocks and other large debris. If animal waste must be removed please cover the spot to protect our equipment from any residue.
- On hard surfaces like driveways and parking lots, please sweep or use a blower to clean the area.

**CT Bounce House LLC reserves the right to refuse rental if we deem the area to be unsafe, inaccessible, likely to damage or soil our equipment or put our delivery crew at risk.**
