

Michel Ebertin -

Our dear friend and colleague Michel Ebertin has died on February 28, 2018 in a tragic accident, from injuries he suffered when he was struck by a vehicle that veered onto a sidewalk in front of the Scottsdale Safeway store at Shea Boulevard and Scottsdale Road, the day before.

Michel Ebertin had over 40 years of experience in Computers, Semiconductors and Systems Design. He was an active member of the IEEE. He received his MSEE degree from the California Institute of Technology.

Michel was Director of Product Development for Rockwell International; VP of Engineering at Atari, Zilog and Plantronics; and VP of Manufacturing for SGS Thomson (Grenoble, France).

He is the holder of multiple patents in the applications of semiconductors.

Michel was one of the original IEEE members to join the AZ Science Lab when it was founded in 2009. For many years he was both a member of the management team and a workshop instructor and volunteer. He will be missed.
