

Farmer

Multi-Resistant Nematode Control Fodder Radish

Farmer is a late flowering, nematode reduction class 1 multi-resistant radish that shows resistance against the white and yellow beet cyst nematode (*Heterodera schachtii* and *betae*) with control of up to 90% reduction possible. Farmer is also resistant against Columbia root-knot nematode (*Meloidogyne chitwoodii* and *fallax*) with a reduction comparable with black fallow (>95% of the nematode population). Farmer is highly resistant against *Alternaria* and can also reduce nematodes like *Trichodorus* (stubby root nematode). Farmer has a deep rooting system that can go up to a depth of 4 1/2 feet.

APPLICATIONS

- Biofumigant and break crop for control of *Heterodera schachtii* (beet cyst eelworm, sugar beet nematode).
- Excellent in rotation with potatoes, sugar beets and vegetables such as carrots, cucumbers, lettuce or other vegetables to reduce Root knot nematodes.
- Well suited for erosion control, weed control and soil till improvement.

FEATURES

- Excellent biofumigant and resistance properties (class I resistance)
- Up to 95% control of Root Knot Nematodes.
- Late maturity
- Long slender taproot

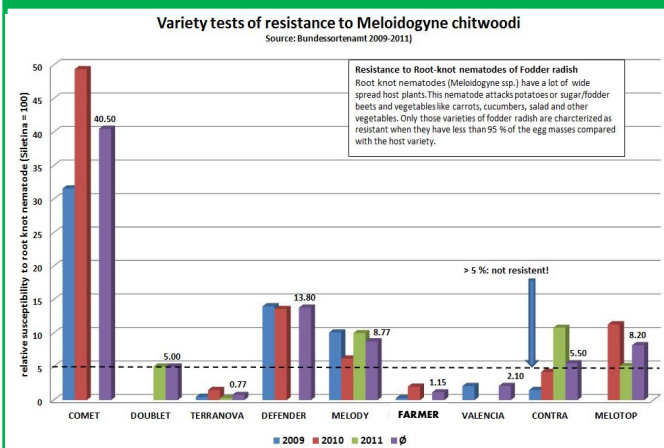

MANAGEMENT

- Seeding Rate (Drilling): 15-18 pounds per acre
- Seeding Rate (Broadcast/Aerial): 18 - 20 pounds per acre
- Planting Depth: 1/4—1/2 inch

BENEFITS

- Reduces white beet cyst eelworm and yellow sugar beet nematodes
- Excellent RKN control in carrots, potatoes and other vegetables.
- Allows for added root and top growth
- Aids in reduction of soil compaction
